PRIME LOCKER - GANGING INSTRUCTIONS

Supplied by installers: #8 or #10 self-tapping screws (quantity depends on application).

1. Align lockers:
Position the lockers together, ensuring they are leveled and the fronts are aligned.
2. Secure lockers:
From inside each locker, use self-tapping screws to secure them together.
Typically, place two screws at the bottom and two at the top.
3. Drill through frame:
Insert screws through the frame near the hinge locations (refer to the example image below).
