Evolve Furniture Group has an extensive offering of laminate finishes to outfit the perfect office environment. Solids, textured patterns and wood grain finishes allow for freedom in design choices. All work surface tops, high pressure or thermally fused, have a tough 3mm edge banding. Edge trims are available to match and coordinate with a variety of finish options (see back panel for details).

Evolve Laminate, Panel Frame & Edge Trim Finishes

Many laminate finishes listed on this card are available in a high pressure or thermally fused laminate option. Please refer to the current price list for availability.

While color consistency and quality are controlled to the highest standards, color may vary slightly from samples shown. For production

samples of these laminate materials or specific technical information, contact your Evolve territory manager.

Maintenance: Damp cloth and non-abrasive liquid detergent.

Please see the chart below for available edge trims and matching laminates:

At Evolve we believe it is our responsibility to protect the environment for future generations. The growing importance of reducing energy consumption and resource sustainability continues to challenge us in this ever-changing marketplace.

Care and Cleaning

The following guide encompasses the Evolve Furniture Group. The guide was compiled using information from our "raw" material suppliers and is relevant only to our standard offering finishes.

Evolve Panel Frames

Evolve panel frames are manufactured out of sturdy steel construction with aluminum trims, with a powder coated enamel paint finish. To clean the frames of the panels, and all hardware associated with Evolve Furniture Group, simply use a clean, damp cloth. For stubborn stains on the panel frames, you may consider adding a mild detergent.

Worksurfaces

The worksurfaces are manufactured using primarily Nevamar Brand laminates as the exposed surface. To properly clean these areas, it is best to use a clean, damp cloth and circular motion to prevent streaks. For stubborn stains, you may add a mild detergent to the water. Be certain not to use an ammonia-based solution. It will react with the PVC, or wood edge trim, causing permanent damage to the contacted areas.

Accessories

The accessories sold within the Evolve product line can be simply cleaned with a clean, damp cloth. If they are very dirty, a mild, non-abrasive solution may be added. Wipe with a damp cloth after the solution, and finally, a dry cloth.

Evolve is Greenguard® certified to rigorous indoor air quality standards for low-emitting interior products and manufactured in ISO 14001 registered facilities.
