CONNECTING PEOPLE SPACES + CARE

For decades, customers have trusted Global Furniture Group to provide product solutions which connect patients, caregivers and their families. As healthcare needs change, our products will continue to foster a positive experience by incorporating choice, comfort and support.

COMMUNITY SPACES

Community spaces play an essential role in shaping the experience within healthcare environments. Designed to encourage connection and offer choice, these spaces comfortably support individuals, families or small groups over long or short-term visits.

PATIENT SPACES

Patient spaces serve multiple functions in today's healthcare environments, not only providing space for safe delivery of clinical services, but facilitating consultation, learning and sharing. These spaces empower patients, while supporting their individual needs for comfort, dignity and care.

CAREGIVER SPACES

Caregiver spaces support the critical role of the healthcare team. Enhancing workflow and engagement, these spaces accommodate a range of tasks including administrative, focused work, peer-to-peer collaboration and patient and family consultation. Creating a positive and supportive work environment enhances the caregiver's health and wellbeing.
