Refurbish, Renew, Refresh

Boulevard’s new vertical and horizontal Flat Trim enables you to give your existing Boulevard workstations a fresh new look. Add aluminum Raceway Covers and Facemount Electrical Duplex Outlets to transform your existing Boulevard workstations to a new level of sophistication and to meet today’s technological requirements.

No need to remove even one panel, binder bin or work surface. Boulevard Flat Trim and Raceway Covers allow you to easily and quickly refurbish existing Boulevard panels – where they stand.

NOTE: All aluminum Flat Trim and Raceway Covers are extruded using recycled aluminum, as are all Boulevard panel frames and posts.

LEED MR Credit 3.3 – Resource Reuse, 30% Furniture and Furnishings

“The objective of this credit is to recognize the environmental benefits of reusing furniture and furnishings...”

LEED MR Credit 4 – Recycled Content Intent: “...incorporate recycled materials, therefore reducing impacts resulting from extraction and processing of virgin materials.”
