A place to focus and engage

Softpod™ responds to the changing landscape of today's workplace, providing an alternative to conventional workstations and cubicles. As an adjunct to collaborative and community spaces, Softpod supports activities that require individual focus and engagement.

Softpod facilitates hybrid schedules that require unassigned workspaces as people move between the office and home. On its own or as a cluster of pods, Softpod supports flexibility within an open plan office.

softpod

Softpod shown in PET Felt, Shamrock and Mist, with worksurfaces and storage in Designer White. Noetic seating shown.

Flexible planning

Two, three, four and five-divider pods provide varying degrees of privacy. The 120° footprint supports clusters of one or more pods in a layout. Integrated wiring solutions for individual and multiple pods deliver power and data above and below the worksurface.

3-divider pod - 72"W x 30"D x 54"H

Standard worksurface

The 3-divider pod with a height adjustable table (HAT) delivers a sit-stand range from 22.5" to 48.9", from the top of the worksurface to the floor. An optional PET Felt extension panel can be added to the back of the worksurface to provide additional privacy in the standing position. The HAT power solution creates new planning opportunities for end-to-end pod connections.

Softpod offers casual storage and accessory options to meet an individual's daily needs. Bag and coat hooks, undersurface storage, whiteboards and shelves keep personal items in sight and within reach. PET Felt extension panels provide additional privacy. Four and five-divider pods support a wraparound worksurface option.
