

BEDSIDE CABINETS
sonoma

healthcare

global

Sonoma™ patient and resident room furniture was developed with the help of healthcare professionals, designers and patients to meet the evolving needs of people in care. Sonoma bedside cabinets support both caregivers and individuals with essential safety features, improved housekeeping and unparalleled durability. A range of models with different storage configurations suit both long-term and acute care applications.

Modular and space saving

Bedside cabinet with three drawers and optional Linear fascia

Bedside cabinet with one adjustable shelf and optional Arc fascia

Bedside cabinet with one fixed shelf, two drawers and optional Linear fascia

Bedside cabinet with one drawer, one adjustable shelf and optional Arc fascia

Sonoma bedside cabinets keep personal items close at hand. Choose from a selection of models with drawer, shelving and door options. The versatile cabinets are modular and align dimensionally with Sonoma wardrobes to maximize available space in the room. Sonoma bedside cabinets are elevated off the floor to simplify housekeeping and support infection control practices.

Additional information can be found on the Global [website](#).

A closer look

Thermofoil tops with an optional spill collector edge are available.

Locks

A lock option is available for the top drawer of all bedside cabinets. A key alike option is available, in addition to a master key for facility administration.

Handles

Seven handle options are available. All handle options deliver minimal interference, gentle contours and generous hand clearance to accommodate people with reduced vision or limited mobility. Custom handle options are available for larger projects.

Glides

Glides on all four legs are height adjustable to ensure that the top surface can be leveled or slightly angled back towards the rear fascia to reduce the likelihood of small objects rolling off the top and out of reach.

Accessories (Optional)

Accessories can be added on either side of the bedside cabinet to provide additional storage and quick access to magazines, facial tissues, bags and other personal items. Accessories are finished in a durable, powder coated epoxy finish that matches the legs and can be easily removed for cleaning.

Shelves

Cabinets with doors offer an adjustable storage shelf that can be removed for cleaning.

Casters (Optional)

Commercial quality, swivel dual wheel manual locking casters facilitate transfer and ease of movement. Fully castered configurations on all four legs are also available.

A closer look

Tops

Tops are available in high pressure laminate, solid surface and Thermofoil. High pressure laminate tops feature a coordinating 3mm polymer edge, providing an easy to clean, durable, and stain resistant surface.

Drawer liner

The styrene plastic liner and organizer is designed to saddle the drawer edges for a perfect fit, while eliminating gaps and potential traps.

Drawer slides

Full extension ball bearing drawer slides are constructed using high quality precision steel. The optional soft close drawer slides ensure an easy and quiet closing motion.

Legs

The legs are constructed of heavy duty aluminum extrusions and provide superior structural integrity due to the continuous attachment along the full length of the cabinet's frame. The legs are finished in color coordinated and environmentally friendly powder coated epoxy. Custom colors are available for larger projects.

Solid surface tops

Optional solid surface tops provide enhanced durability and are stain and scratch resistant.

Ventilation

Ventilation openings are provided at the top of both side gables to promote airflow. All ventilation openings are fitted with a polymer liner for durability and cleaning. Ventilation openings also provide slots for hanging accessories.

Drawers

Cabinet drawer interiors are polymer wrapped for stain and moisture resistance. Drawers can be removed for cleaning or transfer.

Chassis

Chassis panels are fully captured along the entire length of the aluminum leg framework, providing superior strength and structural integrity.
