Improving experience and performance

Instead of breaking the mold, we made the mold. Comprise™ advances the benchmark for healthcare seating with innovative materials and advanced engineering. Contoured, injection molded composite nylon arms and legs create seamless surfaces that are easy to clean, warm to the touch and impervious to infection prevention control reagents.

Comprise arms and legs feature an internal steel structure that provides a metal-to-metal connection to the steel rails supporting the seat and back. The series has an active weight capacity of 400 lbs. per seat (600 lbs. for bariatric seating), is BIFMA Level 3 certified and is backed by Global's Limited Lifetime Warranty.

Seating shown in Luum Datastorm, Silo seats and backs with Fog frames. River+ tables shown.

comprise seating

Freestanding models and multiseat layouts

Comprise is offered in two back heights and a selection of freestanding models for quick specification in waiting areas, community spaces, dining areas and consultation rooms. Arms, legs and rails are available in a contemporary neutral palette, complementing a wide range of textile selections and interior finishes.

Additional information can be found on the Global [website](#).

Fully modular and reconfigurable on-site

Modular multiseat layouts can be configured to suit design and space occupancy requirements. Connecting tables support linear, 90° and 120° planning.

The composite nylon arms and legs are impermeable, resisting chipping, rusting and fading. To minimize downtime, seats, backs, arms and legs can be reconfigured or replaced on-site without additional hardware or specialized tools.

Seating shown in CF Stinson Terra, Jadeite seats and backs with Shadow frames. Tables shown with Sheer Beauty tops.

Power and USB charging where you need it

Comprise is available with tamperproof power and charging outlets that can be mounted above or below the table tops, keeping devices charged up as people move through their day. Available in both White and Black with several port combinations and sizes.

A closer look

Freestanding and modular guest seating, with and without arms

The ergonomically contoured, injection molded arms eliminate the need for separate armcaps and hardware, reducing catch points and simplifying cleaning for better infection prevention control. The same benefits apply to the easy-to-clean shape of the legs.

It's in the details

Purpose built for healthcare

Comprise has an overall scale and proportion that works well across a wide range of healthcare applications, with a design that accommodates a variety of body types and sizes. Comprise provides a generous and comfortable seat for extended periods of time, in addition to being efficient in smaller spaces.

Two textile specifications are available for seats and backs. Optional sealed seams or a moisture barrier on the seat supports performance requirements for acute, ambulatory and long-term care environments.

Seating shown in Designtex Silicon Reveal, Mica seats and Luum Particulate, Granule backs with Toast frames. Tables shown with White Chocolate tops.

Comfort and ergonomics working together

The touch and feel of Comprise is most appreciated in the easy-grip loop arms, which provide users with a comfortable and secure grasp when getting in and out of the chair.
