

rebound

Go ahead, flex your back

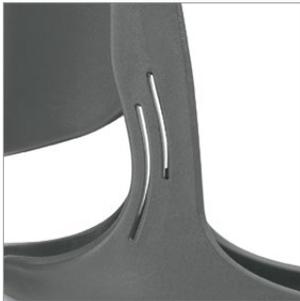

Form follows comfort in Rebound™, an innovative multi-purpose chair, featuring a patented flex back that provides an unexpected level of support. This versatile chair facilitates unrestricted back movement, and encourages focus and engagement.

Seating shown in Frost shell and frame.

Designed to move

About the designer

Alessandro Piretti was immersed in industrial design from a young age through his father, the acclaimed Italian designer Giancarlo Piretti. Alessandro joined his father's design studio shortly after earning his doctorate from the University of Bologna. He invented and patented a unique flex back design, which he incorporated into the Rebound chair for Global.

When minutes turn into hours, Rebound brings seated comfort to common areas, hospitality venues, classrooms, auditoriums and waiting spaces. From a quick chat with a colleague to an afternoon training session, Rebound will follow your move.

Seating shown in Frost shell and frame.

Armchairs

Armchair

Armchair

Armchair with sled base, upholstered seat

Armchair on casters, upholstered seat

Rebound features models with or without arms; with four-legs, sled bases or on casters; and counter or bar height stools. Dress it up with an upholstered seat option from a comprehensive selection of Global Carded or Alliance Partner textiles. In addition to caster options for carpeted and hard flooring, Rebound can be specified with four glide options to best suit the floor surface.

Additional information can be found on the Global [website](#).

Armless chairs

The polypropylene shell is available in 14 contemporary colors, with matching arms, including quiet neutrals and vibrant brights. Pair it with 20 eco-friendly, durable powder coated frame finishes. Or opt for a more classic style by pairing your favorite shell color with a plated frame finish.

Stools

Counter stool with arms, upholstered seat

Bar stool with arms

Stools stack five high on the floor and chairs stack up to five high on the floor or 10 high on the dolly. The color-matching under seat shroud protects the seat surface and upholstery when stacked. Specify Rebound where frequent reconfiguration is required. Stack it and store it at a moment's notice.

Additional information can be found on the Global [website](#).

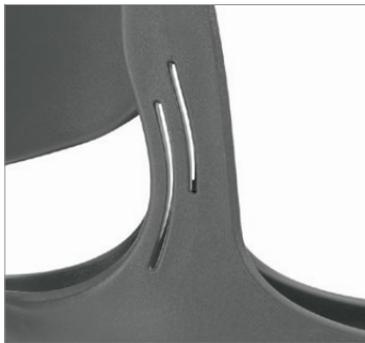

Sustainably minded

Rebound's tubular steel frame and robust polypropylene shell provide exceptional durability in demanding applications and are fully recyclable. Backed by Global's Limited Lifetime Warranty, Rebound chairs with glides are warranted to an active weight load of 400 lbs. (caster models 300 lbs.). Rebound is GREENGUARD Gold certified as part of Global's commitment towards LEED building status and a better environment.
