## Comfortable seating for generously proportioned users

High back heavy duty multi-tilter with headrest

Medium back heavy duty multi-tilter

Robust™ was specifically designed for generously proportioned people who require ergonomically sound seating solutions and rugged durability. Each component was created to provide exceptional strength and tested to exceed normal seating standards so a larger user can be assured of its structural integrity, durability, safety and function.

Arms are made from steel, not plastic. The steel base is larger in diameter to provide extra stability. Casters are far superior and the mechanism was specifically designed for this weight category. No stone was left unturned in seeking to provide larger users with an exceptional and comfortable product that will stand the test of time.

---

# Exceptional and comfortable

Robust has two-tone fabric combinations as standard. The borders along the seat, back, and headrest and the “wing design” on the edge of the seat and back are always upholstered in Black. The remainder of the seat and back are upholstered in customer chosen fabric, vinyl or leather.

For 24 hour settings and high traffic areas, Global recommends selecting textiles that surpass 100,000 double rubs on the Wyzenbeek fabric durability tests.

# It's in the details

UP TO 500 LB. ACTIVE WEIGHT CAPACITY WARRANTY

Optional abrasion resistant outer back fabric (polyester). Resistant to impact damage. Available in Black.
