

triumph

Ergonomic comfort

High back weight sensing sychro-tilter

Triumph™ elevates executive comfort. Designed by Zoey Chu, Triumph provides ergonomic support with a range of adaptable features, including two tilting mechanisms, adjustable lumbar support, a seat slider for depth adjustment, and height adjustable arms with sliding and pivoting armcaps.

Responsive lumbar support

Medium back weight sensing synchro-tilter

Triumph's polished aluminum back frame integrates the lumbar support mechanism. The outer back knob can be adjusted in and out for lumbar depth support and vertically for optimal positioning.

Additional information can be found on the Global [website](#).

Find your fit

Personalize the fit with two mechanism options. The weight sensing synchro-tilter mechanism automatically adjusts to the individual. The multi-tilter mechanism allows the seat and back angle to be configured independently for personal preference and support.

A closer look

Available in high back and medium back models

Adjustable lumbar support is standard

Height adjustable arms with armcaps that slide forward and backward and pivot 30° inwards for optimal arm support

Waterfall seat edge helps relieve pressure from legs

Side activated sliding seat depth adjustment accommodates a range of users

Multi-tilter mechanism models (shown) allow the seat and back angle to be configured independently for individual preference and support

Weight sensing synchro-tilter mechanism models (not shown) automatically adjust to the individual

Polished aluminum base

Dual wheel carpet casters are standard; hard surface casters are available

It's in the details
