

Sheridan College Hazel McCallion Campus:

Enriching the student experience

The Hazel McCallion Campus (HMC) is a vibrant addition to the expanding Mississauga campus at Sheridan College, a leading post-secondary institute. Housing the Architecture, Interior Design, and Visual Merchandizing departments, the newly build space includes formal and informal learning areas along with a range of amenity spaces and athletics facilities designed to build community and enhance the student experience.

Phases 2 and 2A of the HMC campus expansion bring together learning and recreational spaces for students and faculty. At the heart of phase 2 is the Creativity Commons, a light and airy, multi-purpose space with community tables and soft seating that support ways for students to connect and collaborate. The centerpiece is a vivid orange staircase that links a series of learning spaces radiating outward from the Commons.

Phase 2A adds a 70,000 sq. ft. Student Hub with recreation, athletic and amenity spaces designed to enrich the student experience and encourage students to spend more time on campus and with each other. Open and covered walkways, a patio and outdoor turf field create opportunities for activities to spill outside and facilitates connection with the surrounding community. Together, Phases 2 and 2A of the HMC campus contribute to Sheridan's design vision that aims to densify and energize Mississauga's downtown core by providing places to explore, learn, gather, and play.
