CONSUMER EDUCATION

How do I buy a desk?

Choose a non-reflective surface. Global uses colors that reduce glare to make your work easier to read while reducing eye strain.

Get a desk that lets you look ahead. A modular desk is easy to set up initially and then reorganize or reconfigure later to adapt to future needs.

Look for European connectors if you're buying easy to assemble furniture. Global makes assembly easy - all you need is a screwdriver.

Give your business an edge. Each Global desk comes with its own attractive edge design.

Avoid tangles. Make sure your desk has at least one grommet hole to keep computer and telephone wires out of the way.

A hutch should have a sweep that manages computer and telephone wires.

Island worksurfaces let you meet with more than two people at once with ample leg room for all.

Choose one of Global's height/angle adjustable keyboard trays to go with your desk. Your arms can maintain a comfortable position, reducing shoulder, back and neck strain.

How do I select the right workstation?

When searching for the right workstation it is important to consider its purpose which will be decided by the nature of your tasks. It is best to look for products that have been designed and engineered to help make your workspace more productive.

This can be achieved in a variety of ways. As a guide, observe how your work flows through your office in a typical day. It is likely that you'll uncover a number of distinctive and repetitive task patterns.

Once these patterns have been identified, organize them according to their intended use and frequency of their use. Now you are ready to investigate the pertinent factors that will determine the workspace you eventually select.

Lighting - protect yourself

- If you have to set up near a window make sure your computer sits perpendicular to it, minimize eye-strain inducing glare on sunny days.
- If you have fluorescent lights, try to position your set up between the lights.
- Use "parabolic louvers" to reduce the glare from fluorescent lights.
- Use window blinds to control the light source throughout the day.
- Panels or screens may be used to control glare.
- Protect your eyes from Ultraviolet A (UVA) and Ultraviolet B (UVB) by using an anti-glare screen.

Noise

- Try to set up your office in a separate room if possible and away from the rest of the house.

Chair

- Comfort is personal but should be part of the selection.
- Seat pan design; deep and wide enough.
- Rounded front edge (waterfall).
- Adjustable slope seat.
- Able to adjust your chair, to obtain appropriate height.
- Sit back in your chair, with your thighs parallel to the floor.
- Place feet flat on the floor, a footlocker may be required.

Footlocker

- A footlocker helps to prevent possible discomfort resulting from outstretched feet.
- The rocking motion creates light activity in the legs and feet and will help stimulate muscles to improve overall circulation.

Keyboard

- Has a palm rest.
- Easily adjusts the angle of the keyboard.
- Easily adjusts the keyboard height.

Document holder

- A curved back document holder reduces glare.
- Position document holder in line with the monitor to reduce eyestrain.

Monitor

- There should be a direct line from the center of the monitor to the "J" key on your keyboard which should line up with your belt buckle.
- Position the monitor at arm's length.
- Make sure the top of your monitor screen is slightly below eye level.
- A monitor stand may be used to achieve desired height.

Workstation

- Adequate space beneath the worksurface for your legs.
- Depth of the worksurface depends on the task and equipment used to perform this responsibility.
- Try to place tasks that are performed regularly within arm's reach.
- Avoid unnecessary reaching and bending which leads to fatigue and possible muscle strains and can reduce efficiency.
- Keep in mind other related tasks in your planning.
- Establish your workflow then design the essential elements to meet your requirements.

- **FILE DRAWERS** use full extension steel ball bearing slides for smooth action.
BOX DRAWERS use ¾ extension steel ball bearing slides for a smooth action.
- **BOX AND FILE PEDESTALS** are standard and are constructed independently of the chassis, with fully closed bottoms. This picture frame construction technique prevents racking, and provides a product that lasts for years.

- Drawers and end panels are **EDGE BANDED** on all four sides to protect clothing and the floor covering.
- Locks are standard on all box and file pedestals, lateral files, storage cabinets and combination storage units.
- All locking components within each series can be keyed alike at no additional charge. Please specify the request at time of order.

EDGE OPTIONS

- Self, bullnose, T-mold and built-up edges are available on all models. Corners of rectangular, square and boat tables ordered with T-mold or bullnose will be rounded.
- **Bullnose** edge is available in Black (**BLK**) only.
- **T-mold** edge is available in Black (**BLK**) or coordinating laminate finish (**ME**) with upcharge (5%).
- **Self edge and built-up** edges are same color as laminate finish.

GROMMETS

- Grommets available in standard table top locations (left, center or right). Order as: **FOG1**, **FOG2** or **FOG3**. Add \$91.
- Grommet hole dimensions are 3.25" wide x 1.875" deep.

- Actual grommet locations will vary according to base selection.

POWER BLOCK

- A power block (model **PMSPDM**) may be ordered on all worksurfaces.
- A power block is a rectangular worksurface power/data module with one electrical duplex receptacle and two data (RJ45) receptacles. 9' Black cord included. Power block dimensions are 6.5"W x 3.5"D x 2.75"H.
- Actual power block locations vary according to base selection. The locations will be left (E1), center (E2), and right (E3). **Example:** 8' table with drum base does not have a modesty panel, so the power block (E2) can be perfectly centered in the table. An 8' table with a slab base has the modesty panel, so the power block (E2) will be offset alongside the modesty panel.
- To purchase a power block, you must specify both the power block cut-out location and the power block model #. Order power block as **PMSPDM**. Add \$268.
- Power blocks are available in standard worksurface locations (left, center or right). Order as **E1**, **E2** or **E3**. Add \$91.

Power block **PMSPDM**. Add \$268.

Specify location **E1**, **E2** or **E3**. Add \$91.

SPECIFICATIONS

- Specifications marked with an * are applicable to only those products which have the * symbol beside the product name.

WORKSURFACES

- Four material choices: high performance thermally fused laminate, high pressure laminate, veneer and solid surface.
- **Thermally fused laminate** tops are 1" thick overall with a 45 lb. density particle board core and feature 2mm thick edgeband. Edgeband finish can be specified to match or contrast the surface finish.
- **High pressure laminate** tops are 1 1/16" thick with 2mm flat edge or 1 3/16" thick with knife edge. 1 1/16" thick tops have a 45 lb. density particle board core and the 2mm flat edge finish can be specified to match or complement the top surface. 1 3/16" thick tops have an MDF core and the knife edge finish will match top surface. Models ending in **(LK)** indicate high pressure laminate with knife edge.
- **Veneer** tops are 1 3/16" thick overall with choice of edge detail - flat edge or knife edge. Edge finish will correspond to surface finish. When flat edge, core material is 45 lb. density particle board; when knife edge, core material is MDF. Models ending in **(V)** indicate veneer.
- **Solid surface** tops are 1 1/4" thick overall with choice of edge detail - flat edge or knife edge. Solid surface material is 0.5" thick with built up edge profile over a particle board or plywood subtop depending on overall top size. Models ending in **(SF)** indicate solid surface with flat edge; models ending in **(SK)** indicate solid surface with knife edge.
- Please see model # for pricing and availability of various material and edge options.
- Refer to page 323 or globalfurnituregroup.com for available finish options.
- While not all sizes are available in all materials:
 - Worksurfaces of 96" or less in length are standard in one piece (1 carton).
 - Worksurfaces 120" to 144" in length are standard in two pieces (2 cartons).
 - Worksurfaces 96", 120" and 144" x 48" include support channels.

BASES

- **Caution:** to meet BIFMA standards for performance and stability, appropriate base size must be specified with corresponding top sizes identified. **Top plates and base plates vary by base size and will only work with table shape sizes as referenced on the following pages.**
- Bases are constructed of a round or square solid steel metal plate for counter balance, covered with a finished steel shroud, affixed with four bolts to a cold rolled steel tube.
- GRB14H25 attaches to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GSB13H25 and GSOB13H25 attach to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GRB22H15, GRB22H21, GRB22H26, GRB22, GRB22H35, GRB22H41, GSB19H15, GSB19H21, GSB19H26, GSB19, GSB19H35 and GSB19H41 attach to tops with a 6" x 6" steel plate, welded to a 3" diameter steel tube, bolted to a 0.5" thick solid steel counter balance.
- Top plate and base plate of GRB22 and GSB19 models in all heights, have pass-through cut-outs to accommodate a single port simplex or dual USB module to deliver power or USB charging to the surface. This allows the module to be mounted directly above the base and to pass the unit's cord through the base column resulting in the cord and plug head exiting from the bottom of the base for plugging into a floor or wall mount power source.
- GRB28, GRB34, GSB23 and GSB28 attach to tops with an 11" x 11" steel plate, welded to a 4" diameter steel tube, bolted to a 0.375" thick solid steel counter balance.
- Bases are available PAINTED in "Sandtex" finish for extra durability. Also available in plated finishes (see page 323) at an upcharge and with an extended lead time. Please see model # for pricing.
- All bases come with six 0.5" height adjustable glides for leveling on uneven floors.
- Coffee table height bases with 14"H column and 0.375"H levelers.
- End table height bases with 20"H column and 0.375"H levelers.
- Lounge height bases with 25"H column and 0.375"H levelers.
- Seated height bases with 27"H column and 0.375"H levelers.

MODPOWER DAISY-CHAIN SOLUTION

- Add flexible power and USB charging to ConnecTables rectangular tables. Connect up to four units with a single corded infeed with NEMA plug.
- ModPower units are sold separately, refer to Productivity Solutions page 478.
- Begin run with a starter unit which includes a corded infeed. Add additional middle or end units as required. Middle and end units are equipped with connecting cables.
- On-surface modules clamp on or screw mount to the table tops.
- In-surface modules require table top cut-outs for mounting (cannot be used with modesties):
 - Specify cut-out option **MPS** for a single cut-out to accommodate one ModPower in-surface unit (cut-out will be centered on the approach side) for **30" to 72" wide rectangular tables**. **Add \$91**.
 - Specify cut-out option **MPD** for two cut-outs in the left and right positions, 15" from ends to center of unit on approach side for **60", 66" and 72" wide rectangular tables**. **Add \$183**.

SPECIFICATIONS

- Specifications marked with an * are applicable to only those products which have the * symbol beside the product name.

TOP & EDGE OPTIONS

- ConnectTABLES have nine basic top shapes available in various sizes. All top shapes have a variety of straight or curved edges which are referred to as **Working (W)**, **Connecting (C)** or **End (E)** edges. Edges can also have a combination of edge types as shown.

*cannot freestand

Working edge (1) - Edges designated with the letter "W" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in freestanding applications.

Connecting edge (2) - Edges designated with the letter "C" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End edge (3) - Edges designated with the letter "E" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90° crescent tops can be freestanding if the optional center leg is added.

FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs; **connecting tables** are defined as more than one worksurface supported by a single leg at each point of connection. The rule to determine the quantity of legs of an open configuration is the number of worksurfaces plus one (See Figure 1).

On closed configurations, the number of legs is equal to the number of worksurfaces (See Figure 2). There are some exceptions, such as when optional third legs are used on quarter round or 90° crescent shapes.

Figure 1.
Open Configuration
Number of surfaces = 5
Number of legs = 6

Figure 2.
Closed Configuration
Number of surfaces = 6
Number of legs = 6

FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables (**Figure 3**).
- When trapezoid tops are freestanding, legs must be on the outer left and right sides (**Figure 4**).
- 90° crescent worksurfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added (**Figure 5**).
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable (**Figure 6**).

Figure 4 - Trapezoid Tops

Figure 5 - Adding a Third Leg

Figure 6 - Ganging with Connected Tables

CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24"D, 30"D or 36"D) can be connected with one leg, at the connecting or end edges (**Figure 8**).
- Half round worksurfaces can be used in the following ways: They must be of equal width when connected to each other (**Figure 7**) or the connecting shapes must be equal to half the width of the connecting half round (**Figure 8**).
- ConnecTABLES is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90° to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use (**Figure 9**).
- Quarter round and 90° crescent worksurfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round worksurfaces, it is recommended that configuration "A" be used since the outside end of the center leg in configuration "B" is almost flush with the outside edge of the worksurface. If configuration "B" is installed against a wall or where there will be no traffic flow, then configuration "B" can be used.

Figure 7

Figure 8

Figure 9 - 90° Leg Connections

Configuration A

Configuration B

Legs are fastened to worksurfaces utilizing a steel-to-steel connection. Each leg comes equipped with four 0.25" x 0.875" screws. machine screws. Screws are inserted through the four oval shaped holes only. **Do not use wood screws.** When fastening legs to worksurfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs.**

FREESTANDING TABLES

1. Turn worksurface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four 0.25" x 0.875" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

CONNECTING TABLES

1. Determine approximate location of desired configuration in room and turn worksurfaces upside down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first worksurface. Fasten leg with two 0.25" x 0.875" screws.
3. Repeat step 2 and 3 on the opposite edge of the first worksurface.
4. Turn table right side up.
5. Turn table right side up and fasten to the previous top from the underside.
6. To add additional worksurfaces repeat step 5.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.

C CONNECTABLES® - PUTTING IT ALL TOGETHER

OPTIONAL CASTERS

1. Turn worksurface upside down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with glides, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.

OPTIONAL GANGING HARDWARE

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn worksurfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each worksurface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.

Care and Cleaning

Textiles

Fabrics: To extend the life of your seating upholstered in fabric, regularly dust the chair to prevent airborne particles from penetrating the fabric surface.

For light soiling, use a damp cloth and blot the spot with very light pressure, taking care never to soak the fabric. Dry with a clean cloth by blotting - never rub fabric. More intense stains can be treated the same way, but with a mild detergent. Always test fabric first in an unseen area before using any cleaning method.

Leather: For regular cleaning, simply use a soft damp cloth, taking care not to soak the leather. For more thorough treatment, soak a soft cloth in a mild soap solution and wipe surface in a light circular motion. Repeat with clean water. Allow to dry and polish with a soft dry cloth. Do not use detergents, aerosol sprays or other polishes.

Hard Surfaces

Laminate & painted metal finishes: Wipe the surface with a clean soft damp cloth; if needed, a mild soap solution (i.e. Ivory dishwashing liquid) can be used. To prevent streaks, dry the surface with a clean dry soft cloth moving in a circular motion.

Textiles

- **Water-based cleaner (W):** Spot clean, using the foam only from a water-based cleaning agent, such as a mild detergent or non-solvent upholstery shampoo product. Apply foam with a soft brush in a circular motion. Vacuum when dry. Pretest small area before proceeding.
- **Solvent cleaner (S):** Spot clean, using a mild water-free solvent or dry cleaning product. Clean only in a well-ventilated room and avoid any product containing carbon tetrachloride or other toxic materials. Pretest a small area before proceeding.
- **Water/solvent cleaner (WS):** Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room. Avoid any product that contains carbon tetrachloride or other toxic materials. With either method, pretest a small area before proceeding.
- **Vacuum only (X):** Clean this fabric only by vacuuming or light brushing to prevent accumulation of dust and grime. Water-based foam cleaning agents of any kind may cause excessive shrinking, staining, or distortion of the surface pile and therefore, should not be used.
- **Crypton cleaning (C):** Generally stains are removed with plain water and powdered enzyme detergent. Upholstery foam shampoo, water-based cleaning products and germicidal detergents can be used. Be sure to remove all residue from cleaning products with clean water. Do not use solvent-based cleaners or dry cleaning products.
- These recommendations and codes were developed by fabric specialists. However, because of the various ways fabric can be stained or damaged, there is no guarantee that the results will be completely successful. Use suggested methods on your own responsibility. To help prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended. Use professional furniture cleaning service when overall soiled condition has been reached.

This illustrated list price book has been designed to facilitate fast reference and easy use. Products are categorized into “seating”, “desks”, “files”, “panels” or “tables” and are listed numerically within their categories. The line drawings match actual photographs (where possible) to aid in instant recognition of the total range within a series.

Sales of Global Furniture Group (“Global”) products are made only on Global’s standard Terms and Conditions of sale which are contained in this list price book. The “Purchaser” in these Terms and Conditions shall refer to Dealers and those who originally purchase directly from Global for use or re-sale. These standard Terms and Conditions may be modified or supplemented only by a separately written document signed by Global’s authorized personnel at its head office in Toronto, Ontario, Canada. Any term or condition contained in any purchase order or other form used by the Purchaser to order goods (including standard, printed language) which is different from, in addition to, or in any way inconsistent with Global’s standard Terms and Conditions shall be of no force or effect whatsoever.

All illustrations, specifications and prices in this list price book are based on the latest product information available at time of publication. Global reserves the right to make changes at any time and without prior notice to prices, colors, materials, specifications and models offered.

Description

Each product shown or described in this list price book is standard Global product. Available options are noted at the beginning of each series. Available options may require additional delivery time and cost, and may affect the warranty given. Sizes and weights shown are approximate and are subject to slight changes from time to time.

Prices and Payment

The prices shown in this list price book as well as those quoted by Global, are in Canadian dollars for orders shipped to destinations in Canada.

If shipping date requested is more than 90 days from date of order, Global shall reserve the right to use published list prices effective at time of shipment.

Orders are invoiced at time of shipment. Terms of payment are net 30 days from date of invoice unless otherwise stated. The Purchaser agrees that Global shall reserve the right to enforce a charge amounting to 1.5% per month (18% per year) on invoices outstanding more than 30 days.

If the Purchaser’s most recent annual net volume is less than \$5,000, Global may suggest payment be made in advance.

All orders are subject to the Purchaser complying with Global’s prevailing credit policy.

Any products sold by Global shall remain the property of Global until fully paid.

Prices are suggested list prices only and are subject to change without notice. Global will, however, attempt to keep the Purchasers up-to-date on all developments including price changes.

Taxes

All prices shown in this list price book are exclusive of sales, use, excise, HST and other applicable taxes and duties which may be the Purchaser’s responsibility as per the invoice issued by Global. If the Purchaser claims an exemption from such taxes, it shall be the Purchaser’s responsibility to furnish Global with an appropriate exemption certificate at time of order.

Ordering Information

Global requires that all orders be submitted in writing and will be acknowledged on Global’s acknowledgement forms governing the transaction.

The details appearing on this acknowledgement will describe the items to be shipped and the approximate shipping date. It is the Purchaser’s responsibility to determine that the information in the acknowledgment is correct. In the event of an error, the Purchaser must notify their Global Customer Service representative immediately by telephone followed by written confirmation. Shipping dates are assigned to orders based on the items having the longest manufacturing lead time (unless instructed to partial ship).

At time of order, please provide the following information:

1. Account number (if possible)
2. PO number
3. “Bill to” and/or “Ship to” and name and address
4. Complete model number and selected options including textiles/finishes
5. Special instructions and tag information
6. Shipping instructions, please indicate:
 - a. pick up
 - b. Global trailer program
 - c. common carrier, provide name of carrier, your account number
7. Special quote (SQ) # or MTM # (if applicable)
8. Customer’s Own Material (COM), Global Purchased Material (GPM), Customer’s Own Leather (COL), see below.
9. For specials and custom quoted product, please indicate the custom quote # on your PO. If changes are made to the quote a new quote must be issued prior to submitting the order. It is the Purchaser’s responsibility to determine that the information on the quote is correct. Global will not be responsible for wrong product due to errors in the quote.

The above points will be checked by Global for accuracy. Global will process orders using the codes provided by the Purchaser. Price discrepancy is the responsibility of the Purchaser. The Purchaser must notify Global prior to invoicing.

The Purchaser is responsible for providing correct information at time of order. If no option(s) are selected the system will default to standard feature(s). Orders with missing/incorrect information (finish, etc.) will be put on hold until all information is complete. Orders will be scheduled for manufacturing upon receipt of complete information.

Changes and Cancellations

After the date of Global’s acknowledgment of the Purchaser’s order, the order may not be changed or cancelled by the Purchaser without the written consent of Global. Orders for products upholstered in “special order textiles” (GPM) cannot be cancelled once material has been purchased. Special order items, COM and textile-covered items already in production are not subject to change or cancellation under any circumstances. Textile-covered items are considered to be in production once the textile is scheduled for cutting. Other standard items already in production are subject to a minimum 35% cancellation charge.

Errors and Omissions

All quotations, acknowledgements and invoices are subject to corrections for any errors and omissions.

Casters

The list price book specifies the caster which comes standard with each chair model. Most chairs are equipped with C1 or C65 casters which are best used on carpeted surfaces. If it is intended to use the product on hard surfaces such as ceramics, concrete, linoleum or hardwood, it is recommended to use different casters. It is the responsibility of the customer to determine the standard caster for a particular product and whether such caster is appropriate for the given application. The Arm and Caster section illustrates the caster options offered by Global and their suggested uses.

FINISHES

Seating Finishes - Painted

Where painted frames are not a standard color, a special quote is required.

Seating Finishes - Wood Stains

A one time setup fee of \$250 net will be applied per order for custom wood staining/color matching requests. This payment will be valid for 5 years from the date it is set up. After 5 years, the \$250 setup fee will apply again. Restrictions may apply. The customer must provide a 3” x 3” color chip/sample.

For application of customer’s own wood stain, there will be an upcharge of 10% list price, per unit (in addition to the option upcharge, when applicable). For orders with custom stain unit quantities of 30 or more, the upcharge may be reduced or eliminated. A [Special Product Request](#) must be submitted for a quotation.

Custom Wood Staining

Custom wood staining procedure for wood seating is as follows. Customer provides a sample of the desired wood finish. That sample is sent to Specials department. Several finished samples will be sent back. The customer/end user will sign off on the samples (keeping one for their records) and return the rest of the samples. Global will not necessarily match the wood species but rather will generate a color that will coordinate with the sample when it is applied to the wood species used in the seating frame.

File Finishes

There is no upcharge on any standard file finish. Any non-standard file finish must be approved by Global prior to acceptance of order and may be subject to an upcharge.

9100 Series, 9100 Plus Series, 9300 Series, 9300 Plus Series, 9700 Series, G Series Pedestals, and E Series Pedestals can be ordered in non-standard finishes with a 10% upcharge on orders up to and including 10 units. There is no upcharge on orders of 11 units or more.

Please note:

- You can only combine 9100 Series files and 9100 Plus Series files to meet the 11 unit minimum.
- You can only combine 9300 Series, 9300 Plus Series, and 9700 series to meet the 11 unit minimum.

An upcharge of 10% will apply to Metallic, Mica, Tungsten and any non-standard White finishes regardless of the number of units ordered.

Wood Veneer Finishes

Because the distinctive characteristics and the nature of wood products cause variations, exact matches are not always possible. Global will not be held responsible if the finishes cannot be matched.

Customer's Own Material (COM)

Use of COM must be approved by Global prior to acceptance of order. Please submit the Authorization Request Form. Photocopy and use this form as often as necessary. The customer must provide a 12" x 12" textile sample and advise how the textile is to be applied and quantity of textile being sent. **Textile yardage requirement will be advised by the factory, and additional yardage may be required if pattern requires matching.** Upon approval from Global, send textile to the COM Department at: 596 Supertest Road, Toronto ON, M3J 2M5. Send to the address provided on shipping document upon approval from Global. If COM is difficult to apply or if product is required to be modified, extra charges will apply. Global reserves the right to cancel an order at any time if COM is inadequate for any reason. COM must be shipped freight and duties paid if applicable to our factory. Such shipment must be fully identified with the Purchaser's order number, and the item for which the material is intended. Performance of COM when applied to product is the sole responsibility of the Purchaser. Global's standard product warranty shall not apply to COM.

COM price is the lowest published price/grade for the series. The published yardage requirement for COM orders is approximate and shown beside each item in the list price book. The yardage shown there is based on the textile requirements for cutting and sewing a single chair in a plain patterned textile. For textiles with a pattern repeat or for COM orders involving 10 or more chairs, please consult with Customer Service for recalculation of the yardage requirements as this may significantly change the textile requirement.

Textile Grading

All products are priced according to their standard textile grade. Lower grade textiles may be available but at the same price as standard textile grade. See Textiles and Finishes section for graded textiles.

Combining two grades of textiles may result in a revised grade. Please refer to "Two Grades Combination Chart" in the Textiles and Finishes section. For more than two textiles a special quotation is required.

Global Purchased Material, Customer Specified (GPM)

Global may purchase material specified by the customer. Use of GPM must be approved by Global prior to acceptance of order. If it is difficult to apply or if product is required to be modified, extra charges will apply. Global reserves the right to cancel an order at any time if GPM is inadequate for any reason. Performance of GPM when applied to product is the sole responsibility of the textile vendor. Global's standard warranty will not apply to GPM materials.

Customer's Own Leather (COL)

Not all seating can be upholstered in leather. Please consult series notes for availability. COL price is the lowest published grade for the series (leather or fabric).

Upholstery Coverings

Slight variations in color may occur between dye lots. Although Global attempts to minimize these variances, they do occur and must be accepted as normal and will not be considered defects.

Leather is a Natural Product

Natural variations occur in the color, grain and texture of leather. As a result, a degree of variation should be expected. As leather is used it develops a patina. Its color changes slightly, it will get marked and it will stretch and pull, these are the hallmarks of genuine leather and are not considered defects.

Yardage

Required yardage (yd) is based on unmatched materials with widths of 54" for seating, 63" for panels.

Arms

A wide selection of arms are available for some series. See Arm Chart in the Seating list price book.

Weight

In the Seating list price book, weight is provided for both unit weight and carton weight. In the Desking + Tables and Metal Filing + Storage list price books, carton weight is provided.

Delays

Global's order acknowledgment will state a shipping date which is Global's best estimate at the time the order is acknowledged. However, Global shall not incur any obligation or liability to the Purchaser for failure to ship by specified date unless Global has agreed to an unequivocal shipping date in a separately signed written document executed by its authorized personnel at its head office. In addition, Global will not be liable for any loss or damage resulting from any delay or failure in shipment or other failure to perform all or any part of the agreement between the parties with respect to the goods shown on the face of the order acknowledgement where such delay, failure, loss or damage is the proximate result of any act of any governmental authority or political subdivision thereof, revolution, riot, civil disorder or disturbance, delay or default in transportation, strike disputes among or between labor unions or other labor disputes, delay or inability in obtaining materials and facilities, fire, flood, act of God or any cause not within the reasonable control of Global.

Free on Board (FOB)

FOB point is Global's Factory, Toronto, Ontario, Canada.

Courier Type Shipments

This symbol is used to indicate that the adjacent product can be sent by courier type shipments, such as Federal Express, Purolator, CanPar and UPS.

Shipping

The Purchaser must select, at time of order, one of two methods of freight payment. Global will make no end-user shipments unless special arrangements have been made.

1. FOB point of shipment, freight collect - pick up and common carrier.
2. FOB point of shipment, freight prepaid and invoiced to the Purchaser - Global Trailer Program.

All deliveries are dock to dock.

This may increase depending on the type of product. Global's Return Goods Authorization (RGA) numbers must appear prominently on all authorized returns. Global will not be responsible

for return freight costs. No credit will be given if goods cannot be reused as new. Special order items, non-stock items and COM products are in no event subject to return. All returns must be approved and authorized in writing by Global Customer Service. Global reserves the right to refuse delivery of any unauthorized returns.

Claims

All goods are sold FOB plant or Global Distribution Center. Global is not responsible for damage which occurs in transit (or in storage). The carrier signs for all goods received in apparently good order. It is the Purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier for losses or damage to the product occurring during transit, including concealed damage.

Any claims made against Global for apparent defects, errors or shortages must be made by the Purchaser, in writing, within 15 working days after any delivery. Failure by the Purchaser to make any claim against Global within 15 days shall constitute acceptance of the goods and a waiver of any apparent defects, errors or shortages.

Suspension

In the event that the Purchaser defaults in the payment of any sum due to Global, or in the event the Purchaser's financial condition becomes unsatisfactory to Global, Global shall have the right to defer or discontinue shipment of any goods until such time as the default is cured or the Purchaser provides assurance of payment to Global.

Fire Codes

Flame resistant components are most often requested to be tested to comply with California Technical Bulletin 11, often referred to as CAL117. The foam used in Global chairs meets the requirements of California TB117 and all of the upholstery fabrics Global offers meet this requirement. In addition, most Global seating models can be certified to California TB133. This available certification can be done when selected seating models are upholstered in specific textiles. The list of certifiable seating models and available textiles changes from time to time. Please contact Customer Service for a list of certifiable models and upholstery materials. There are other fire codes that are not commonly specified. Global Upholstery Ltd. can usually provide test results for any North American code. Please contact Customer Service. Please see chart below for CAL TB 133 upcharges and for complete CAL TB 133 information refer to the Global Dealer Centre.
