- For environmental certifications, please visit [globalfurnituregroup.com](http://globalfurnituregroup.com).

## WORKSURFACES

- Four material choices: high performance thermally fused laminate, high pressure laminate, veneer and solid surface.
- **Thermally fused laminate** tops are 1" thick overall with a 45 lb. density particle board core and feature 2mm thick edgeband. Edgeband finish can be specified to match or contrast the surface finish.
- **High pressure laminate** tops are 1 1/16" thick with 2mm flat edge or 1 3/16" thick with knife edge. 1 1/16" thick tops have a 45 lb. density particle board core and the 2mm flat edge finish can be specified to match or complement the top surface. 1 3/16" thick tops have an MDF core and the knife edge finish will match top surface. Models ending in **(LK)** indicate high pressure laminate with knife edge.
- **Veneer** tops are 1 3/16" thick overall with choice of edge detail - flat edge or knife edge. Edge finish will correspond to surface finish. When flat edge, core material is 45 lb. density particle board; when knife edge, core material is MDF. Models ending in **(V)** indicate veneer.
- **Solid surface** tops are 1 1/4" thick overall with choice of edge detail - flat edge or knife edge. Solid surface material is 0.5" thick with built up edge profile over a particle board or plywood subtop depending on overall top size. Models ending in **(SF)** indicate solid surface with flat edge; models ending in **(SK)** indicate solid surface with knife edge.
- Please see model # for pricing and availability of various material and edge options.
- Refer to page 323 or [globalfurnituregroup.com](http://globalfurnituregroup.com) for available finish options.
- While not all sizes are available in all materials:
  - Worksurfaces of 96" or less in length are standard in one piece (1 carton).
  - Worksurfaces 120" to 144" in length are standard in two pieces (2 cartons).
  - Worksurfaces 96", 120" and 144" x 48" include support channels.

## BASES

- **Caution:** to meet BIFMA standards for performance and stability, appropriate base size must be specified with corresponding top sizes identified. **Top plates and base plates vary by base size and will only work with table shape sizes as referenced on the following pages.**
- Bases are constructed of a round or square solid steel metal plate for counter balance, covered with a finished steel shroud, affixed with four bolts to a cold rolled steel tube.
- GRB14H25 attaches to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GSB13H25 and GSOB13H25 attach to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GRB22H15, GRB22H21, GRB22H26, GRB22, GRB22H35, GRB22H41, GSB19H15, GSB19H21, GSB19H26, GSB19, GSB19H35 and GSB19H41 attach to tops with a 6" x 6" steel plate, welded to a 3" diameter steel tube, bolted to a 0.5" thick solid steel counter balance.
- Top plate and base plate of GRB22 and GSB19 models in all heights, have pass-through cut-outs to accommodate a single port simplex or dual USB module to deliver power or USB charging to the surface. This allows the module to be mounted directly above the base and to pass the unit's cord through the base column resulting in the cord and plug head exiting from the bottom of the base for plugging into a floor or wall mount power source.
- GRB28, GRB34, GSB23 and GSB28 attach to tops with an 11" x 11" steel plate, welded to a 4" diameter steel tube, bolted to a 0.375" thick solid steel counter balance.
- Bases are available PAINTED in "Sandtex" finish for extra durability. Also available in plated finishes (see page 323) at an upcharge and with an extended lead time. Please see model # for pricing.
- All bases come with six 0.5" height adjustable glides for leveling on uneven floors.
- Coffee table height bases with 14"H column and 0.375"H levelers.
- End table height bases with 20"H column and 0.375"H levelers.

- Bungee SL takes the popular aesthetic of the Bungee series and allows tables to be specified in shared leg and permanent applications - great for benching, training, teaming and academic areas.
- Bungee SL tops and legs are sold separately, increasing the flexibility of the product in the future and allows for space saving in areas where real estate is a premium.
- High pressure tops are available in all Bungee SL laminates at an extended lead time - please refer to model # for pricing.
- For environmental certifications, please visit [globalfurnituregroup.com](http://globalfurnituregroup.com).

## CONSTRUCTION

- Tops are 1" thick.
- All laminate components are made of 45 lb. density particle board with high performance thermally fused laminate.

**BS** - rounded corner, Silver

**BB** - rounded corner, Black

## SPECIFICATIONS

- Specifications marked with an \* are applicable to only those products which have the \* symbol beside the product name.

## TOP & EDGE OPTIONS

- ConnectTABLES have nine basic top shapes available in various sizes. All top shapes have a variety of straight or curved edges which are referred to as **Working (W)**, **Connecting (C)** or **End (E)** edges. Edges can also have a combination of edge types as shown.

\*cannot freestand

**Working edge (1)** - Edges designated with the letter "W" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in freestanding applications.

**Connecting edge (2)** - Edges designated with the letter "C" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

**End edge (3)** - Edges designated with the letter "E" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90° crescent tops can be freestanding if the optional center leg is added.

## FREESTANDING AND CONNECTING CONDITIONS

**Freestanding tables** are defined as any one worksurface supported by two or more legs; **connecting tables** are defined as more than one worksurface supported by a single leg at each point of connection. The rule to determine the quantity of legs of an open configuration is the number of worksurfaces plus one (See Figure 1).

On closed configurations, the number of legs is equal to the number of worksurfaces (See Figure 2). There are some exceptions, such as when optional third legs are used on quarter round or 90° crescent shapes.

**Figure 1.**  
**Open Configuration**  
Number of surfaces = 5  
Number of legs = 6

**Figure 2.**  
**Closed Configuration**  
Number of surfaces = 6  
Number of legs = 6

## FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables (**Figure 3**).
- When trapezoid tops are freestanding, legs must be on the outer left and right sides (**Figure 4**).
- 90° crescent worksurfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added (**Figure 5**).
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable (**Figure 6**).

- **DO NOT DRAG TABLES WHEN RE-CONFIGURING.**

**Figure 5 - Adding a Third Leg**

**Figure 6 - Ganging with Connected Tables**

## CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24"D, 30"D or 36"D) can be connected with one leg, at the connecting or end edges (**Figure 8**).
- Half round worksurfaces can be used in the following ways: They must be of equal width when connected to each other (**Figure 7**) or the connecting shapes must be equal to half the width of the connecting half round (**Figure 8**).
- ConnecTABLES is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90° to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use (**Figure 9**).
- Quarter round and 90° crescent worksurfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round worksurfaces, it is recommended that configuration "A" be used since the outside end of the center leg in configuration "B" is almost flush with the outside edge of the worksurface. If configuration "B" is installed against a wall or where there will be no traffic flow, then configuration "B" can be used.

**Figure 7**

**Figure 8**

**Figure 9 - 90° Leg Connections**

**Configuration A**

**Configuration B**

Legs are fastened to worksurfaces utilizing a steel-to-steel connection. Each leg comes equipped with four 0.25" x 0.875" screws. machine screws. Screws are inserted through the four oval shaped holes only. **Do not use wood screws.** When fastening legs to worksurfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs.**

## FREESTANDING TABLES

1. Turn worksurface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four 0.25" x 0.875" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

## CONNECTING TABLES

1. Determine approximate location of desired configuration in room and turn worksurfaces upside down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first worksurface. Fasten leg with two 0.25" x 0.875" screws.
3. Repeat step 2 and 3 on the opposite edge of the first worksurface.
4. Turn table right side up.
5. Turn table right side up and fasten to the previous top from the underside.
6. To add additional worksurfaces repeat step 5.
7. When all the tops have been connected, level complete configuration by adjusting glides.

**Note:** Use the same procedures as above when using optional thumb screws.

## C CONNECTABLES® - PUTTING IT ALL TOGETHER

### OPTIONAL CASTERS

1. Turn worksurface upside down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with glides, level table by adjusting glides.

**Note:** Casters are available in locking or non-locking styles.

### OPTIONAL GANGING HARDWARE

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn worksurfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each worksurface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.
