veneers and solid woods

Descor provides high quality veneers and solids for our customers. Sourced from North America with a progressive approach to sustainability, ensures our vendors are protecting and maintaining the natural forests of origin.

Descor lays-up its own flat cut (cathedral pattern) in book matched set and patterns standard on cherry, maple and walnut veneer. Rift cut veneer are laid-up in a slip match method standard on oak veneer.

For additional information on veneer species, cuts and patterns, please contact your Customer Service representative.

DESCOR CONVERSION VARNISH SPECIFICATION

Descor uses conversion varnish: It is among the most durable finishes used in the contract furniture industry (more durable than catalyzed lacquer). Conversion varnish is a synthetic, catalyzed cured (chemically active) finish, containing UV inhibitors to slow the oxidizing (colour changing) effects of ultra-violet rays on wood.

Descor produces low 25° sheen. Low sheens are the most practical for commercial use as it doesn't show most scratches and are more easily touched-up than higher sheens.

Cures with heat, developed two ways:

- Chemically (catalyst reaction within the varnish itself)
- Line oven (approximately 140° F) accelerates finish curing and increases molecular density for a harder finish.

Conversion varnish has a component called "solids", produced by a combination of resins when the solvent evaporates. These solids float to the varnish surface, which is where they cure. These solids are the durable aspect of the finish.

Descor uses an "off-the-gun" technique with conversion varnish. This means the "solids" (the durable aspect of the finish) remain intact on the surface of the finish.

Descor's standard finish on oak and walnut is open pore, on cherry and maple is semi-closed pore. If a full fill finish is required for cherry and maple tops, add the suffix "2" to the finish code and add 5% to the base pricing for each product.

Custom finish is available at an up-charge (See finishes and options section).

GENERAL INSTALLATION AND HARDWARE

UNCARTONING

Always uncarton wood office furniture with care. Never use a knife or sharp object of any kind to open cartons. Tear cartoning tape off by hand. Protective corner blocks, foam-wrap, and a bottom skid are included in the carton during shipping for protection.

Hardware: All necessary hardware for attaching furniture is included in the shipment.

Hanging file rails: Pre-installed on file drawer perimeters and accommodates both legal and letter size filing.

INSTALLATION

Stack-on: Descor utilizes a non-marring method of Stack-on unit attachment. They are installed with double faced tape applied to the bottom of the unit. The tape is shipped in a plastic bag found in the Stack-on unit. Removal of the Stack-on unit requires moderate pressure to be applied on the top of the unit towards the wall for at least a minute for the pressure sensitive tape to release. At the dealer or installer's discretion, additional support may be added by installing L brackets along the outside back of the attached units. These L brackets are not included in the shipment. Please see Accessories.

Riser Box: Descor utilizes both; mechanical and a non-marring method of Riser Box attachment. Riser Box is installed with double faced tape applied to the bottom of the unit and bolts that secure the unit to the underside of the Peninsula Table. The tape and bolts are shipped in a plastic bag found in the Riser Box.

Freestanding Pedestals: Have four pre-drilled pilot holes [two left (L) / two right (R)] on the inside top surface of the Pedestal top. In order to attach the Freestanding Pedestal 27.5"H (without the Riser Box) to the Peninsula Table the pedestal drawer/file must be removed. Depending on which side the Pedestal will be used, two pilot holes (L or R side) must be drilled through to allow for connection to the Peninsula Table. Assembly bolts are included in a plastic bag fastened inside the pedestal. Disassemble the Pedestals first before relocating the entire unit to avoid damage or bodily injuries.

Levelling wood office furniture properly is the most important procedure to ensure proper functioning and alignment of drawers, locks and doors. Upon completing installation, wipe furniture with a damp cloth, followed by a dry soft cloth.

CARE AND MAINTENANCE GUIDE

Wood Caseworks Care: Descor furniture is constructed to strict specifications to ensure years of satisfied use. As with all wood products, certain care requirements and periodic maintenance are necessary in order to maintain the original new appearance and function.

Finish Protection: All clear wood finishes are susceptible to scratches from rough and abrasive objects, such as staples, paper clips, ceramic coffee mugs, flower pots, picture frames, etc. Computer equipment with rubber feet can also cause discolouration and softening of the finish due to petroleum distillates in the rubber. Glass tops are the ultimate protection against scratch mishaps. The most practical protection is the use of desk-pads or blotters, paper management bins, coasters, common sense caution with rough items, and adding pressure sensitive felt to the feet or bottoms of any potentially destructive item on the Desk.

Finish Care: Wax or polish should never be used on the catalysed finish; they will give a greasy, cloudy or uneven appearance to the product. Descor's conversion varnish finish is best cleaned by wiping the surfaces with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are very dirty, use of a glass cleaning type of product is recommended.

Never use a silicon based product to dust or polish catalysed finishes. Over time, silicon may disrupt the actual molecular composition of the finish and cause it to soften and become cloudy.

Additional Tips:

- Remove any spilled liquid immediately with a blotting, rather than a wiping motion.
- Do not drag or push objects or stacks of papers across any finely finished surface.
- Avoid exposing surfaces to extreme heat, cold or humidity.
- The surface finish may be burn resistant, however, the wood underneath the finish is not and can be charred by a burning cigarette or heat producing unit.
- Exposure to strong sunlight should be avoided. The surface finish is fade-proof, however, in spite of UV inhibitors in the finish, the wood underneath may change colour (patina) where extended exposure to sunlight exists. Natural or light finished species are especially susceptible to UV colour change.
- Building maintenance and maintenance service management should be notified of the proper care instructions and procedures for your furniture to avoid damage and allow optimum appearance for years to come.
- Special care should be taken to protect wood furniture when other trades such as painters, electricians and telecommunications workers are present performing work.
- Drawer suspensions are lubricated prior to shipment. Periodic lubrication may be applied to the ball bearing housing with a high quality lubricant found in most hardware stores.
- Drawer alignment is achieved with proper levelling of desks and credenzas.
- Check levelling glides for adjustment if the furniture is moved.
- Modular furniture items, such as Peninsula Tables and Pedestals must be disassembled prior to moving or relocating to avoid damage to the furniture.
- Touch-up of wood furniture should only be attempted by a qualified re-finisher touch-up technician. Contact your furniture dealer if this need should arise.
