### Series Detailing:

Dufferin detailing is contemporary with a 2" overhang knife edge on user and guest sides, self-edge on ends and wall sides. User and guest side edges are 1/8" wide by 1/2" thick for an overall thickness of 1 3/16".

Dufferin is a "top over pedestal" detailed series. Top ends are flush with end-panels and storage.

## CONSTRUCTION

**Finish:** Conversion varnish (similar to catalyzed lacquer, but tougher), 25° sheen. Descor does not buff or rub its finishes.

**360° Finishing:** All Descor casegood products are finished on the back sides (except modular under-surface storage - tops and backs are unfinished).

**Veneers and Solids:** Veneers and solids are Number One select, architectural grade "A" oak, walnut, cherry or maple. All Descor wood worksurface moulded edges are solid oak, walnut, cherry or maple.

**Laminate:** Low pressure laminate will be used on all chassis, fronts and doors. High pressure laminates will be used on all tops. Doors, fronts and user side of all tops (Dufferin edge) will be edgebanded with 1/8" PVC edge, all remaining parts/edges will have a standard 1/32" PVC edge.

**Pedestals:** Full-to-the-floor. Pedestals are fully assembled units that are either installed into desk and credenza shells, or available as modular units. Undersurface storage units include locks.

**Series Handles:** Handles must be specified.

**Drawer Suspensions:** Pedestal drawer suspensions are metal ball bearing type. Both box and file drawers are full extension.

**Hanging file rails:** Are pre-installed on file drawer perimeters. The back rail in a lateral file drawer is designed for both legal and letter size filing.

**Drawer Construction:** Drawer sides and bottoms are wrapped black vinyl. Veneered drawer interiors are available as an option (Contact Customer Service).

**Drawer Fronts:** The drawer front is an applied element to a four sided drawer. Drawer fronts are veneered on all surfaces. Drawer fronts can be removed or replaced in the field.

**Leveling Glides:** Levelers have a 1" range of adjustment.

## VENEERS AND WOOD SOLIDS

Descor provides high quality veneers and solids to our customers.

We procure wood globally but mainly in North America and Europe with a progressive approach towards sustainability. We ensure our vendors are protecting and maintaining the natural forests of origin. Descor lays-up its own flat cut (cathedral pattern) in book matched set and patterns. Rift cut veneers are laid-up in a slip match method.

For additional information on veneer species, cuts and patterns please contact your customer service representative.

## DESCOR CONVERSION VARNISH SPECIFICATIONS

Descor uses conversion varnish: It is among the most durable finishes used in the contract furniture industry (more durable than catalyzed lacquer).

Conversion varnish is a synthetic, catalyzed cured (chemically active) finish, containing UV inhibitors to slow the oxidizing (color changing) effects of ultra-violet rays on wood.

Descor produces low 25° sheen. Low sheens are the most practical for commercial use as it doesn't show most scratches and are more easily touched-up than higher sheens.

Cures with heat, developed two ways:

- Chemically (catalyst reaction within the varnish itself)
- Line oven (approximately 140° F) accelerates finish curing and increases molecular density for a harder finish

Conversion varnish has a component called "solids", produced by a combination of resins when the solvent evaporates. These solids float to the varnish surface, which is where they cure. These solids are the durable aspect of the finish.

Descor uses an "off-the-gun" technique with conversion varnish. This means the "solids" (the durable aspect of the finish) remain intact on the surface of the finish.

Descor's standard finish on oak and walnut is open pore, on cherry and maple is semi-closed pore. If a full fill finish is required for walnut, cherry and maple tops, add the suffix "2" to the finish code and add 5% to the base pricing for each product.

Custom finish is available at an upcharge (See Finishes and Options).

## COLOR SPECIFICATION

Note:

- To choose All Wood Finish, add suffix "W" to the end of the product code.
- To choose All Laminate Option 1, add suffix "P1" to the end of the product code.
- To choose All Laminate Option 2, add suffix "P2" to the end of the product code.

## GENERAL INSTALLATION AND HARDWARE

### Uncartoning

Always uncarton wood office furniture with care. Never use a knife or sharp object of any kind to open cartons. Tear cartoning tape off by hand. Protective corner blocks, foam-wrap, and a bottom skid are included in the carton during shipping for protection.

**Hardware:** All necessary hardware for attaching furniture is included in the shipment. Actual wall-attachment fasteners for wall cabinets, Tackboards and Visual Boards are not included due to variable site conditions.

**Hanging file rails:** Pre-installed on file drawer perimeters and accommodates both legal and letter size filing.

**Flat-plates:** Are used to attach Bridges and Returns to Desks and are shipped pre-attached to the bottom of the Bridge or Return. Mini-flat-plates for securing Bridge Back Panels to Desk or Credenza End-Panels, and quick connectors for securing modular Corner Units to adjacent pieces, are shipped along with screws in a plastic bag attached to the bottom of the Bridge or Return.

**Caution: Using screws other than those supplied by Descor could result in damage to finished tops. Descor will not honor claims due to installation of incorrect hardware.**

**Installation:** Wall-mounted cabinets, Tackboards and Visual Boards are pre-attached with horizontal wall rails to the back of each unit. The wall-side components must be detached from the unit and fastened to the wall accordingly. Wall fasteners are not included due to the variable site conditions. Securing the wall rail to a vertical structural member is the required manner of installation. The Cabinet or Visual Board is then lowered on to the wall rail. It is important to level the wall rail before installation. Wall cabinets are equipped with levelers at the bottom of the back panels for proper cabinet alignment. Units with doors are equipped with adjustable European door hinges to assist in door alignment. It is required to use a #8 wood screw through the back of the cabinet and the wall-mounted rail, to further secure the wall attachment. Tackboards have vertical grooves in the back for tasklight wiring.

**Hutches:** Descor utilizes a non-marring method of Hutch attachment. They are installed with double faced tape applied to the bottom of the end panels. The tape is shipped in a plastic bag found in the Hutch. Removal of the Hutch requires moderate pressure to be applied on the top of the unit towards the wall for at least a minute for the pressure sensitive tape to release. At the dealer or installer's discretion, additional support may be added by installing flat-plates along the outside back of the attached units. These flat-plates are not included in the shipment.

**Hutch tackboards:** Factory installed.

**Modular storage units:** Have pre-drilled holes through the unfinished tops for securing to the bottom of the work surfaces. Screws and lock keys are included in a plastic bag fastened inside the pedestal. Installer should leave a 1/8" reveal between the Modular Storage Unit and the End panel. Disassemble the Modular Unit first before relocating the entire unit to avoid damage or bodily injuries.

**5-sided corner tables:** Join Bridge and Credenza run-offs, using the supplied quick-connectors. Recessed end-panels in these units are pre-drilled to accept quick-connectors for easy alignment. Accurate leveling is critical for these units to align and connect properly. Flat-plates are pre-attached to the work surface to secure to the desk unit.

**Upon completing installation, wipe furniture with a damp cloth, followed by a dry soft cloth.**

**Leveling wood office furniture properly is the most important procedure to ensure proper functioning and alignment of drawers, locks and doors.**

## CARE AND MAINTENANCE GUIDE

**Wood Casegoods Care:** Descor furniture is constructed to strict specifications to ensure years of satisfied use. As with all wood products, certain care requirements and periodic maintenance are necessary in order to maintain the original new appearance and function.

**Laminate Chassis:** This sturdy and durable finished surface can be cleaned with a damp cloth. If the product is really dirty, a mild detergent solution may be used.

**Finish Protection:** All clear wood finishes are susceptible to scratches from rough and abrasive objects, such as staples, paper clips, ceramic coffee mugs, flower pots, picture frames, etc. Computer equipment with rubber feet can also cause discoloration and softening of the finish due to petroleum distillates in the rubber.

Glass tops are the ultimate protection against scratch mishaps.

The most practical protection is the use of desk-pads or blotters, paper management bins, coasters, common sense caution with rough items, and adding pressure sensitive felt to the feet or bottoms of any potentially destructive item on the Desk.

**Wood Finish Care:** Wax or polish should never be used on the catalyzed finish; they will give a greasy, cloudy or uneven appearance to the product. Descor's conversion varnish finish is best cleaned by wiping the surfaces with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are very dirty, use of a glass cleaning type of product is recommended.

**Laminate Finish Care:** The work surfaces are manufactured using primarily Nevamar® Brand laminates as the exposed surface. To properly clean these areas, it is best to use a clean, damp cloth. For stubborn stains, you are able to add a mild detergent to the water. Be certain not to use an ammonia-based solutions. It will react, causing permanent damage to the contacted areas.

**Never use a silicon based product to dust or polish catalyzed finishes. Over time, silicon may disrupt the actual molecular composition of the finish and cause it to soften and become cloudy.**

### Additional Tips:

- Remove any spilled liquid immediately with a blotting, rather than a wiping motion.
- Do not drag or push objects or stacks of papers across any finely finished surface.
- Avoid exposing surfaces to extreme heat, cold or humidity.
- The surface finish may be burn resistant, however, the wood underneath the finish is not and can be charred by a burning cigarette or heat producing unit.
- Exposure to strong sunlight should be avoided. The surface finish is fade-proof, however, in spite of UV inhibitors in the finish, the wood underneath may change color (patina) where extended exposure to sunlight exists. Natural or light finished species are especially susceptible to UV color change.
- Building maintenance and maintenance service management should be notified of the proper care instructions and procedures for your furniture to avoid damage and allow optimum appearance for years to come.
- Special care should be taken to protect wood furniture when other trades such as painters, electricians and telecommunications workers are present performing work.
- Drawer suspensions are lubricated prior to shipment. Periodic lubrication may be applied to the ball bearing housing with a high quality lubricant found in most hardware stores.
- Drawer alignment is achieved with proper leveling of desks and credenzas.
- Check leveling glides for adjustment if the furniture is moved.
- Modular furniture items, such as Desk Shells and Modular Pedestals **must be disassembled** prior to moving or relocating to avoid damage to the furniture.
- Hutch and wall cabinet doors may require field adjustment, from time to time, due to shifting weight load factors inside the cabinet.
- Touch-up of wood furniture should only be attempted by a qualified refinisher/touch-up technician. Contact your furniture dealer if this need should arise.
