**EXAMPLE - HOW TO SPECIFY**

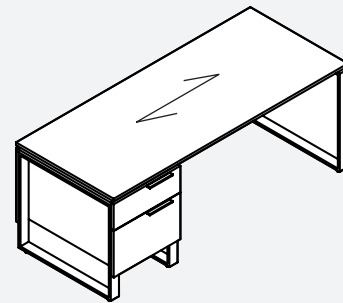

**CODES:** The price list uses a numbering system with meaningful alphanumeric characters to create a simple-to-understand product number. This makes specifying the product easy and accurate.

**SPECIFICATION EXAMPLE OF A DESK UNIT**

**PRODUCT CODE:** FSL7230B  
 F = Foundations  
 S = Single  
 L = Pedestal on Left  
 7230 = Size: Width x Depth  
 B = Pedestal Style

**FINISH:** Choose Finish

**NOTE:** Arrow indicates direction of grain.

## CONSTRUCTION

**Finish:** Conversion varnish (similar to catalyzed lacquer, but tougher), 25° sheen. Descor does not buff or rub its finishes.

**360° Finishing:** All Descor wood casegood products are veneered and finished on the back sides (except modular under-surface storage - tops and backs are unfinished).

**Engineered Veneer:** Is standard on Casegoods.

**Pedestals and Credenzas:** Are suspended 7 ½" off the floor by an open framed aluminum leg. Locks are always located on the side panel. Handle placement is offset from the centre towards the lock. Overall height is always 26 ½".

**Drawer Suspensions:** Pedestal drawer suspensions are metal ball bearing type.

Both box and file drawers are full extension.

**Hanging file rails:** Are pre-installed on file drawer perimeters. The back rail in a lateral file drawer is designed for both legal and letter size filing.

**Drawer Construction:** Drawer sides and bottoms are wrapped black vinyl. Veneered drawer interiors are available as an option (see finishes and options section).

**Drawer Fronts:** The drawer front is an applied element to a four sided drawer. Drawer fronts are veneered on all surfaces. Drawer fronts can be removed or replaced in the field.

**Leveling Glides:** Levelers have a 1" range of adjustment.

## ENGINEERED WOOD VENEER

Engineered veneer is real wood that through a manufacturing process of slicing, dying, gluing and re-slicing achieves consistent wood grain and colour structure.

Veneer is purchased by the block and sliced into a rift cut slip matched pattern to a thickness of 0.6mm (1/42")

Descor lays up rift cut veneers in a slip match method.

For other natural or engineered veneers, species, cuts and patterns, please contact Customer Service.

## DESCOR CONVERSION VARNISH SPECIFICATIONS

Descor uses conversion varnish: It is among the most durable finishes used in the contract furniture industry (more durable than catalyzed lacquer).

Conversion varnish is a synthetic, catalyzed cured (chemically active) finish, containing UV inhibitors to slow the oxidizing (colour changing) effects of ultra-violet rays on wood.

Descor produces low 25° sheen. Low sheens are the most practical for commercial use as it doesn't show most scratches and are more easily touched-up than higher sheens.

Cures with heat, developed two ways:

- Chemically (catalyst reaction within the varnish itself)
- Line oven (approximately 140° F) accelerates finish curing and increases molecular density for a harder finish

Conversion varnish has a component called "solids", produced by a combination of resins when the solvent evaporates. These solids float to the varnish surface, which is where they cure. These solids are the durable aspect of the finish. Descor uses an "off-the-gun" technique with conversion varnish. This means the "solids" (the durable aspect of the finish) remain intact on the surface of the finish.

Descors standard finish on oak and walnut is open pore, on cherry and maple is semi-closed pore. If a full fill finish is required for walnut, cherry and maple tops, add the suffix "2" to the finish code and add 5% to the base pricing for each product.

Custom finish is available at an upcharge (see finishes and options section).

## GENERAL INSTALLATION AND HARDWARE

### Uncartoning

Always uncarton wood office furniture with care. Never use a knife or sharp object of any kind to open cartons. Tear cartoning tape off by hand. Protective corner blocks, foam-wrap, and a bottom skid are included in the carton during shipping for protection.

**Hardware:** All necessary hardware to assemble the furniture is included in the shipment. Actual wall-attachment fasteners for wall cabinets and tackboards are not included due to variable site conditions.

**Hanging file rails:** Pre-installed on file drawer perimeters and accommodates both legal and letter size filing.

**Connecting Brackets:** Are used to attach Bridges and Returns to Desks and are shipped pre-attached to the bottom of the Bridge or Return. Additional screws are shipped in a plastic bag.

**Installation:** Wall-mounted cabinets and tackboards are shipped with pre-attached horizontal wall rails at the back of each unit. The wall-side components must be detached from the unit and fastened to the wall accordingly. Wall fasteners are not included due to the variable site conditions. Securing the wall rail to a vertical structural member is the required manner of installation. The cabinet or tackboard is then lowered on to the wall rail. It is important to level the wall rail before installation. Wall cabinets are equipped with levelers at the bottom of the back panels for proper cabinet alignment. Units with doors are equipped with adjustable European door hinges to assist in door alignment. It is required to use a #8 wood screw through the back of the cabinet and the wall-mounted rail, to further secure the wall attachment. Tackboards have vertical grooves in the back for tasklight wiring.

**Transaction Counter and Decorative Panels:** Are shipped knock down.

To assemble it follow the assembly instruction sheet included. To secure the transaction counter to the desk, double sided tape is applied to the bottom of the end panels. Included screws must be used to attach the decorative panel to the desk.

**Modular storage units:** Have pre-drilled holes through the tops for securing to the bottom of the work surfaces. Screws and lock keys are included in a plastic bag fastened inside the pedestal. Pedestals may be installed flush or offset. Disassemble the Modular Unit first before relocating the entire unit to avoid damage or bodily injuries.

**Work Walls:** Incorporate storage units, credenzas and niches of different sizes, attached to the base with connecting bolts. Upper units are installed with plastic dowels. Small connectors are supplied to secure the units thru the side panels. Complete assembly instruction is included with the wall unit. All necessary connectors and dowels are shipped in a plastic bag.

**Credenza Backpanels and Display Walls:** Optional credenza backpanels and display walls are attached to the units with supplied quick connectors. To assemble the display wall follow the assembly instructions included. All connectors and confirmat screws are shipped in a plastic bag.

**Tables:** All table components are shipped in multiple boxes. Screws and table connectors are packed in a separate box identified with the label "Hardware Enclosed". Assembly instructions for specific tables are included.

You may visit [www.globalcontract.com](http://www.globalcontract.com) to find the assembly instructions under Resources - Installation Manuals - Foundations

**Caution:** Using screws other than those supplied by Descor could result in damage to finished tops. Descor will not honor claims due to installation of incorrect hardware.

Upon completing installation, wipe furniture with a damp cloth, followed by a dry soft cloth.

Leveling wood office furniture properly is the most important procedure to ensure proper functioning and alignment of drawers, locks and doors.

## CARE AND MAINTENANCE GUIDE

**Wood Casegoods Care:** Descor furniture is constructed to strict specifications to ensure years of satisfied use. As with all wood products, certain care requirements and periodic maintenance are necessary in order to maintain the original new appearance and function.

**Finish Protection:** All clear wood finishes are susceptible to scratches from rough and abrasive objects, such as staples, paper clips, ceramic coffee mugs, flower pots, picture frames, etc. Computer equipment with rubber feet can also cause discoloration and softening of the finish due to petroleum distillates in the rubber.

Glass tops are the ultimate protection against scratch mishaps.

The most practical protection is the use of desk-pads or blotters, paper management bins, coasters, common sense caution with rough items, and adding pressure sensitive felt to the feet or bottoms of any potentially destructive item on the Desk.

**Finish Care:** Wax or polish should never be used on the catalyzed finish; they will give a greasy, cloudy or uneven appearance to the product. Descor's conversion varnish finish is best cleaned by wiping the surfaces with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are very dirty, use of a glass cleaning type of product is recommended.

**Never use a silicon based product to dust or polish catalyzed finishes. Over time, silicon may disrupt the actual molecular composition of the finish and cause it to soften and become cloudy.**

### Additional Tips:

- Remove any spilled liquid immediately with a blotting, rather than a wiping motion.
- Do not drag or push objects or stacks of papers across any finely finished surface.
- Avoid exposing surfaces to extreme heat, cold or humidity.
- The surface finish may be burn resistant, however, the wood underneath the finish is not and can be charred by a burning cigarette or heat producing unit.
- Exposure to strong sunlight should be avoided. The surface finish is fade-proof, however, in spite of UV inhibitors in the finish, the wood underneath may change colour (patina) where extended exposure to sunlight exists. Natural or light finished species are especially susceptible to UV colour change.
- Building maintenance and maintenance service management should be notified of the proper care instructions and procedures for your furniture to avoid damage and allow optimum appearance for years to come.
- Special care should be taken to protect wood furniture when other trades such as painters, electricians and telecommunications workers are present performing work.
- Drawer suspensions are lubricated prior to shipment. Periodic lubrication may be applied to the ball bearing housing with a high quality lubricant found in most hardware stores.
- Drawer alignment is achieved with proper leveling of desks and credenzas.
- Check leveling glides for adjustment if the furniture is moved.
- Modular furniture items, such as Desk Shells and Modular Pedestals **must be disassembled** prior to moving or relocating to avoid damage to the furniture.
- Hutch and wall cabinet doors may require field adjustment, from time to time, due to shifting weight load factors inside the cabinet.
- Touch-up of wood furniture should only be attempted by a qualified refinisher/touch-up technician. Contact your furniture dealer if this need should arise.
