GC SONIC

model GC6508WS

model GC6525WS

STANDARD FEATURES

- GC Sonic offers a large variety of solutions for patient rooms, public and reception areas and activity rooms, either as stand-alone or as a beam seating solution.
- The versatility continues with plastic or upholstered seat/back options. For convenience and additional space, the four-legged models stack.
- Four-legged/freestanding models are standard with a straight leg or with a “WS” wall saver frame in Chrome and durable polypropylene glides.
- “WS” models have a wall saver frame design; rear legs hit the baseboard first leaving clearance between the back of the chair and the wall, saving both the chair and the wall from damage.
- Four-legged/freestanding models are stackable up to 5 high on floor and 10 high on dolly 6517WS.
- Upholstered chairs have a polypropylene seat shroud to prevent imprints on the upholstery on the seat below when they are stacked.
- Units available with or without arms. Arms available in Black finish.
- For healthcare textiles, visit the website at [globalfurnituregroup.com](http://globalfurnituregroup.com).

EACH HEALTHCARE CHAIR IS BUILT WITH FEATURES THAT ARE ERGONOMICALLY DESIGNED TO PROMOTE GOOD POSTURE AND PROVIDE MAXIMUM COMFORT. WHILE FULLY SUPPORTING YOUR BODY, THESE FEATURES SHOULD ALSO ALLOW YOU TO ADJUST YOUR CHAIR TO FIT YOU.

## A TENSION ADJUSTMENT

Increase or decrease to match body weight. Allows you to rock comfortably, without heavy pushing, reducing muscle fatigue.

## B CHAIR TILT LOCK

Lock the tilt movement in position(s) to accommodate your working posture. Allows you to lock your chair in a comfortable and supportive position. (Can be either single position, multiple position or infinite position.)

## C SEAT HEIGHT

Raise or lower to allow your feet to rest flat on the floor. Avoids pressure under your thighs, easing blood flow.

## D BACK/LUMBAR HEIGHT ADJUSTMENT

Raise or lower to position lumbar support in your lumbar area. Reduces likelihood of back pain.

## E SEAT DEPTH

Change the depth of the seat to accommodate the length of your thighs. Keeps your back in contact with the backrest while avoiding pressure behind your knees. Can be sliding (MD) or manual.

## F SEAT ANGLE ADJUSTMENT

Allows chair to tilt forward changing the angle of your thighs in relation to the floor. Helps reduce disc pressure during forward leaning tasks.

## G BACK ANGLE ADJUSTMENT

Adjust to change the angle of your torso in relation to your thighs. Helps reduce disc pressure and relaxes your back muscles.

## H ARM HEIGHT

Raise or lower to support your forearms. Reduces muscular effort in neck and shoulders, minimizing risk of pain.

## J KNEE-TILT MOVEMENT

Chair tilts from a pivot point at the front of the seat, keeping your feet on the floor as you rock. Maintains stability.

## L SYNCHRO-TILT MOVEMENT

Backrest reclines at a faster rate than the seat, increasing the angle between your torso and thighs. Enhances comfort and encourages dynamic body movement.

## M WATERFALL SEAT EDGE

Reduces pressure at the back of your knees, contributing to good blood flow.

## N CONTOURED CUSHION

Supports the body effectively, allowing you to sit longer without discomfort.

## P VIBRATING SEAT & BACK

Soothing effect contributes to your relaxation during work breaks.

## Q WIDTH ADJUSTABLE ARMS

Allows outward movement of armrests to match shoulder breadth. Ensures armrests properly support forearms, reducing muscular efforts in neck and shoulders.

## R ARM ROTATION

Rotate armcaps to support your forearms in various positions. Reduces muscular effort in neck and shoulders minimizing risk of pain.

## S CENTRE TILT

Chair tilts from a pivot point under the centre of the seat allowing you to rock. When your feet are well supported, blood flow is enhanced.

## U SOFT DESCENT PNEUMATIC LIFT

Gently and gradually lowering the seat helps you easily select proper seat height without causing a jerking motion.

## V LUMBAR DEPTH ADJUSTMENT

Increase or decrease curvature of the back to match the profile of your lower back. Enhances comfort and support in the lower lumbar area.

## MAXIMIZING YOUR ERGONOMIC SEATING

- Always select a chair that is designed for the type of work you perform and make certain the chair is comfortable for the length of time spent using it.
- Ensure that the seat and back cushions are contoured to fit your body, which will help eliminate pressure points.
- An ergonomically designed chair should allow changing positions easily.
- As you work, reposition yourself throughout the day to reduce strain and stress on specific muscle groups. If you change job functions, adjust your chair to fit the new task.
- Proper ergonomic seating should help eliminate many of the work related injuries that result from poor posture and poorly designed chairs.
