DREME

model GC35042

Drawer box surface

STANDARD FEATURES

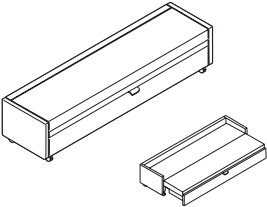

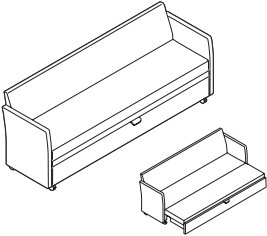

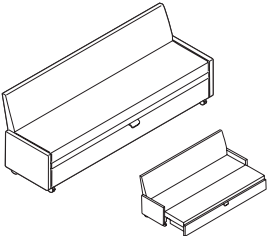

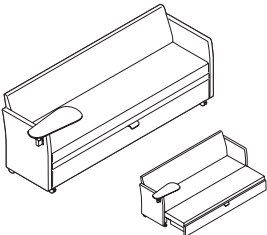

- Dreme has a compact, comfortable design that offers a place to sit or easily converts into a generous sleep surface. The various configurations include a bench with or without back and with or without arms. All models are listed.
- The seat deck is a clean through metal platform for superior strength.
- The seat/sleep cushion is attached to the unit with straps that are held in place by metal-to-metal fasteners for unparalleled strength and durability. This allows sheets to be tucked in place.
- There is a clean out space to the floor at the back of the seat cushion in support of housekeeping and infection control practices.
- The seat cushion folds open to create a 36" deep sleep surface area. Foam is standard high density Ultracell, for enhanced comfort and long-term performance.
- Below the seat deck is a closed drawer box that pulls out, increasing the sleep area.
- The sleep surface cushion and drawer box covering are upholstered in Bantam Vinyl to ensure moisture barrier protection. These surfaces are 9:1 (water to bleach) cleanable. Please select **(BM)** color. See Morbern Bantam textile card for color samples.
- All other surfaces can be specified in your textile of choice.
- The drawer section of the unit has a Chrome handle to assist adjusting the unit from a bench to a sleep surface.
- The lower portion of the unit is supported by four heavy duty supporting non-locking casters when in sleep position and is standard without storage.
- Straps can be unfastened for field replacement of the cushion, if required for any reason.
- Dreme requires zero wall clearance to open into sleep position.
- Standard configuration for all models: two metal legs in front position, two non-locking swivel casters in back position (to assist with moving the unit). Optional front, locking, swivel casters **(BC)** are available. Add \$54.
- A tablet arm is available on units with arms only. The tablet surfaces attach to the outside of the arm (will add 4" to the length of the overall length per tablet). The tablet swivels up and can be moved over the arm and swiveled into place for use by the occupant. The oblong oval shaped tablet is a phenolic surface, strong, non-porous and extremely durable. It offers a no-spill edge and is standard in soft Black. Tablet designation is based on seated position. See models with tablet option for ordering.
- Interior sleep surface: 79"L x 37"W
- All textiles are railroaded across all Dreme components.
- For healthcare textiles, visit the website at globalfurnituregroup.com.

EACH HEALTHCARE CHAIR IS BUILT WITH FEATURES THAT ARE ERGONOMICALLY DESIGNED TO PROMOTE GOOD POSTURE AND PROVIDE MAXIMUM COMFORT. WHILE FULLY SUPPORTING YOUR BODY, THESE FEATURES SHOULD ALSO ALLOW YOU TO ADJUST YOUR CHAIR TO FIT YOU.

A TENSION ADJUSTMENT

Increase or decrease to match body weight. Allows you to rock comfortably, without heavy pushing, reducing muscle fatigue.

B CHAIR TILT LOCK

Lock the tilt movement in position(s) to accommodate your working posture. Allows you to lock your chair in a comfortable and supportive position. (Can be either single position, multiple position or infinite position.)

C SEAT HEIGHT

Raise or lower to allow your feet to rest flat on the floor. Avoids pressure under your thighs, easing blood flow.

D BACK/LUMBAR HEIGHT ADJUSTMENT

Raise or lower to position lumbar support in your lumbar area. Reduces likelihood of back pain.

E SEAT DEPTH

Change the depth of the seat to accommodate the length of your thighs. Keeps your back in contact with the backrest while avoiding pressure behind your knees. Can be sliding (MD) or manual.

F SEAT ANGLE ADJUSTMENT

Allows chair to tilt forward changing the angle of your thighs in relation to the floor. Helps reduce disc pressure during forward leaning tasks.

G BACK ANGLE ADJUSTMENT

Adjust to change the angle of your torso in relation to your thighs. Helps reduce disc pressure and relaxes your back muscles.

H ARM HEIGHT

Raise or lower to support your forearms. Reduces muscular effort in neck and shoulders, minimizing risk of pain.

J KNEE-TILT MOVEMENT

Chair tilts from a pivot point at the front of the seat, keeping your feet on the floor as you rock. Maintains stability.

L SYNCHRO-TILT MOVEMENT

Backrest reclines at a faster rate than the seat, increasing the angle between your torso and thighs. Enhances comfort and encourages dynamic body movement.

M WATERFALL SEAT EDGE

Reduces pressure at the back of your knees, contributing to good blood flow.

N CONTOURED CUSHION

Supports the body effectively, allowing you to sit longer without discomfort.

P VIBRATING SEAT & BACK

Soothing effect contributes to your relaxation during work breaks.

Q WIDTH ADJUSTABLE ARMS

Allows outward movement of armrests to match shoulder breadth. Ensures armrests properly support forearms, reducing muscular efforts in neck and shoulders.

R ARM ROTATION

Rotate armcaps to support your forearms in various positions. Reduces muscular effort in neck and shoulders minimizing risk of pain.

S CENTRE TILT

Chair tilts from a pivot point under the centre of the seat allowing you to rock. When your feet are well supported, blood flow is enhanced.

U SOFT DESCENT PNEUMATIC LIFT

Gently and gradually lowering the seat helps you easily select proper seat height without causing a jerking motion.

V LUMBAR DEPTH ADJUSTMENT

Increase or decrease curvature of the back to match the profile of your lower back. Enhances comfort and support in the lower lumbar area.

MAXIMIZING YOUR ERGONOMIC SEATING

- Always select a chair that is designed for the type of work you perform and make certain the chair is comfortable for the length of time spent using it.
- Ensure that the seat and back cushions are contoured to fit your body, which will help eliminate pressure points.
- An ergonomically designed chair should allow changing positions easily.
- As you work, reposition yourself throughout the day to reduce strain and stress on specific muscle groups. If you change job functions, adjust your chair to fit the new task.
- Proper ergonomic seating should help eliminate many of the work related injuries that result from poor posture and poorly designed chairs.
