**STANDARD FEATURES**

- The Adeline series is an ideal solution for patient or guest seating. The series includes fixed and flex back patient chairs with a choice between models with curved upper back or a straight upper back design. The straight top back design offers an upper, contoured headrest area. A low, straight back bariatric model is also available.
- The flex back moves with the user, providing comfort and support while seated.
- Sleek oval tube steel frame available in powder coat, painted finishes. See options.
- Armcaps are available in standard healthcare urethane finishes. See options.
- Seats have a seamless, waterfall front edge and include an underseat, water resistant, coated liner. Select sealed underside (**SU**) for added protection. See upcharge. Standard seat height on all models is 18"
- Seat and back are standard with high density Ultracell foam and include a clean out space.
- Sealed seat seams may be specified with approved coated textiles (vinyl, silicone, polyurethane) to mitigate liquid penetration at seams. Specify (**SE**) for sealed seat seams. See upcharge.
- Curved back models have zipper closures. Straight back models have a staple strip closure. For sealed back seams, specify (**SWZ**) Sealed Back Seams with Zipper for curved back models and (**S2**) Sealed Back Seams on straight back models. See upcharge.
- Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- A moisture barrier is available on seats to create an impervious barrier between the upholstery cover and cushion, specify (**MB**). See upcharge. Moisture barrier is not recommended with coated textiles (vinyl, silicone, polyurethane, etc.). Moisture barrier **may not be specified** when sealed seams are selected on seats.
- Bariatric model GC7694 has a low, straight back with a 28" wide seat. An upholstered, structural side panel is included on either side of the frame. Choose a coordinating Allante FFree vinyl color to complement armcap colors, see options.
- Standard with Black, nylon glides. An optional, natural nylon, non-marking glide is available.
- Optional tamperproof fasteners (**TF**) are available. See upcharge.
- Active weight capacity is 350 lbs. for standard seating and 750 lbs. for Bariatric seating.

- Chairs may be specified with contrasting fabrics. Specify seat cushion separate from back cushion. For pricing, start with the base price and add applicable graded textile upcharges for both back and seat textile selections.
- The blended textile matrix does not apply to this series when specified as noted above. For alternate textile applications, contact Customer Care.
- The series is covered under Global's Healthcare warranty for 12 years, 24/7 use when specified with approved healthcare textiles and maintained according to warranty.
- For healthcare textiles and finish options, visit the website at [globalfurnituregroup.com](http://globalfurnituregroup.com)
- Can be upholstered in standard Global textiles if healthcare compliance is not required.
- Shipped fully assembled.

For added security and infection prevention, order sealed lining (SU), see upcharges. The sealed lining option seals the staple strip making it tamper resistant and leak proof.
- For use with approved coated textiles (vinyl, silicone, polyurethane), optional sealed seams are available to mitigate liquid penetration at seams. Specify (SWZ) for back sealed seams with waterproof zipper, and (SE) for sealed seat seams, see upcharges. *Note: minor puckering is common with the addition of sealed seams due to material buildup at corners on seats and backs to mitigate liquid penetration at seams.*
- For moisture barrier on seat, specify (MB). Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- Offsets and cleanout around all sides of seats simplify cleaning with easy to wipe surfaces and reduced number of materials used for simplified cleaning and infection control.
- Glass filled nylon, easy to grip loop arms and legs offered in 5 different colors.
- Painted metal rails match arm and leg finish.
- An optional matching painted metal armless rail shroud is available to cover the set of rails, visible between the seats in multi-seat, armless configurations. The shroud provides a single, cleanable surface across the rails. Specify (ARS), see upcharges. The armless shroud can also be field installed on existing layouts (specify modular model C4PRSN).
- Standard with color matching nylon glides (ST), suitable for most surfaces. Natural nylon, non-marking glides (NM) are also available.

- Matching wallsaver feet (WS) are optional on freestanding seating and benches. Upcharges vary, see model. Freestanding models receive two wallsaver feet. Please note, with wallsaver glides on chairs, there is an additional 1.3" in depth on medium back models, 0.88" on high back models. Specify color to match legs.
- Floor mount (FM) glides are optional in Black only. Upcharges vary, see model.
- Table tops are standard in thermally fused laminate (TFL). High pressure laminate (HPL) and Solid Surface (CO) are also available. Upcharges vary, see model.
- Tamperproof fasteners (TP) are optional on all models. Upcharges vary, see model.
- Seating models may be specified with contrasting fabrics. Specify seat cushion separate from back. For pricing, start with the base price and add grade upcharges for both seat and back selections. *Note: the blended textile matrix does not apply to this series when specified as noted above.*
- For healthcare textiles, visit the website at [globalfurnituregroup.com](http://globalfurnituregroup.com).
- Comprise is covered under Global Healthcare 12 year, 24/7 warranty when upholstered with approved healthcare textiles.
- Can be upholstered in standard Global textiles if healthcare compliance is not required.
- Warranted to support up to 400 lbs. active weight capacity per seat for standard size seating and 600 lbs. for bariatric seating.
- Power/charging units are specified separately for field installation. See Comprise Modular on page 84. Each unit includes a tamper resistant simplex, USB-A and USB-C charging ports. Choose undermount or clamp-mount for use under/on tables and table tops. Available Black (B) or White (W) with 10' long cord. Connecting tables and end tables are pre-drilled for undermount power attachment.

## COMPRISE MODULAR

### STANDARD FEATURES

- Comprise series features a refined, modern design with versatile freestanding and modular guest seating. The series achieves high durability with nylon arms and legs on a metal rail structure; engineered for rigorous healthcare and high-traffic environments, it maximizes long-term value with fully replaceable and field reconfigurable components, ensuring a significant return on investment.
- For standard features and option descriptions, see Comprise pg. 74. To see each modular component specification options, please refer to the [build-it feature](#) on the website.

### Modular Components

- The series offers all components required to build endless runs of seats, benches and connecting tables within the parameters outlined.
- Modular components are shipped separately for field assembly.
- The modular design is based on rail sizes, determining number of tops (seat & back, bench seat and/or table top) that they support.

### Modular Structural Components

- Rails are available in 11" modular lengths, from 22" to 66". Rails are non-handed. Each rail assembly includes two rails (front and back) and requires legs to support each end (end leg or center connecting legs). Specify finish to match legs.
- End legs, end legs with arms, center connecting legs and center connecting legs with arms are non-handed and shipped with hardware to attach the units to rails. Specify finish to match legs.
- Center connecting tables are available in either 10" or 22" widths. These kits include rails, tabletop and hardware. They connect between center connecting legs only. Specify rail finish to match legs.
- 90- and 120-degree center connecting tables are corner tables. They include rails, corner leg and corner tabletop with connecting hardware. Corner connecting tables connect between center connecting legs only. Specify rail and leg finish to match adjacent legs.
- Bariatric single seat tops and bariatric benches include rails and must mount between end or center connecting legs. Specify rail finish to match legs.

### Rail-Mounted Components

- Single seats and single bench seats include attachment hardware to mount on rails (specified separately). Seats are shipped preassembled with back attached to seat.
- Center arm (C4PCA) mounts on rails between rail-mounted single seats, benches and tables. The arm is non-handed and includes hardware. Select finish to match end legs and rails.
- 10" and 22" single table tops, no rail (C4PT10R and C4PT20R) mount to rails. 10" table tops mount on either end of a 32" rail or centered on a 54" rail only. 22" table tops mount along rail in standard seat locations. Attachment hardware is included.

- Armless rail shrouds (C4PRSN) attach to the rail between rail-mounted components where a center arm is not desired. The shroud is not required, but recommended to cover the rails visible between components to provide a cleanable surface between components. Specify finish to match rail.

### Specification Steps for Comprise Modular

#### Plan the layout:

- Determine length of run(s) required. Comprise rails are based on 11" increments, with lengths starting at 22" up to 66"; supporting 1, 2 and 3 seat positions. 32" and 54" rail lengths support a combination of one or two seats or benches with 10" tables.

#### Specify Legs and Rails:

- Beginning a run with an **end leg**: legs and arms are non-handed; specification can begin from either end of run. Specify the end leg (with or without arm).
- Beginning a run with a **connecting end table**: end tables are non-handed; planning can begin from either end of a run. Specify the end table, then specify a center connecting leg (with or without arm).
- Specify a rail of desired length. Select the appropriate length of rail needed for seating, benching or tabletop sections. Specify rail finish to match leg finish.

#### Connecting Rail Sections:

- **Required**: a center connecting leg with or without arm must be specified to connect one rail to another. Connecting legs and arms are non-handed. Specify finish to match rails and legs.

#### Spanning Rail Sections with Connecting Tables:

- Center connecting tables include rails. Support the end of rail by first specifying a center connecting leg. Next, specify either a 10" or 22" center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

#### Corner Connecting Tables:

- 90- and 120-degree center connecting tables include rails. Support the end of the rail by first specifying a center connecting leg. Next, specify either a 90 or 120 degree center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

#### Modular Bariatric Seats and Bariatric Benches:

- Bariatric seats and benches include rails and may be positioned at end-of-runs or mid-run. Bariatric modular units must be used in combination with their supplied, unique rails and require legs on either end (end legs or center connecting legs).

#### Ending the Modular Run:

- To end a run, specify an end leg (with or without arms) at the end of the last rail.
- To end a run with a connecting end table, first specify a center connecting leg (with or without arms) at the end of the last rail, then specify the connecting end table.

#### Rail-Mounted Components

- Single seats, single benches, 22" table tops and center arms are available to specify on top of rails. Each module can be placed along the rails at 22" increments. Center arms mount between rail-mounted components. Center arms cannot mount at ends of rails.
- 10" table tops mount on ends of 32" rails or centered on 54" rails.

#### Final Details:

- Wallsaver foot is optional on all modular leg assemblies and recommended when seating is configured against a wall.
- Armless rail shroud, ordered separately (C4PRSN) is recommended to cover rails visible between seats, benches and tables wherever rail-mounted center arms are not used.
- Undermount and clamp mount power units may be specified for use on tables. Connecting tables, rail-mount tables and end tables include pre-drilled holes for undermount power.

### STANDARD FEATURES

- Nourish is an innovative, state-of-the-art patient chair, developed in consultation with leading healthcare professionals. It embraces the body, cultivating comfort during periods of recovery.
  - All chair models have left and right, easy to operate transfer arms. Transfer arms allow users to easily transfer in and out of the chair and provide easy access to assist the user.
  - Models with fixed legs have a standard seat height of 18.5".
  - Models with adjustable legs have adjustment pins to conveniently adapt seat heights from 17" to 20". 20" seat height models (-20) have a seat height adjustment range of 20" to 23". Front and back legs can be adjusted separately allowing modification of seat pitch, forward or rearward.
  - Models with rear casters allow for 'tip and move' so the chair can be conveniently relocated while unoccupied. Optional Back Push Bar (**PBR**) and Rear Foot Rail (**RFR**) are each available to aid staff in relocating the chair (not for patient transport, see upcharges. Back Push Bar and Rear Foot Rail match frame finish. Note, Rear Foot Rail is not available on model GC3698 (4 manual locking caster model).
  - Select models have a unique Schukra depth adjustable headrest solution integrated inside the back near the user's neck area. The depth is controlled by a handle on the lower outer back cushion.
  - Schukra depth adjustable lumbar support for additional comfort is standard on select models.
  - Standard models have minimal flex to the back. Flex back models (F model suffix) have additional back movement.
  - Seats have a seamless, waterfall front edge, with highly durable, molded high density foam and a coated liner (**CL**) underside. For added protection, specify (**SU**) sealed underside to include a sealed staple strip.
  - Metal frame is available in several paint finishes.
  - The arm structure finish is Tungsten with a urethane armcap, available in five finishes.
  - Sealed seams may be specified with approved coated textiles (vinyl, silicone, polyurethane) to mitigate liquid penetration at seams. Specify (**SWZ**) for sealed back seams with waterproof zipper and (**SE**) for sealed seat seams. Upcharges apply. Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
  - A moisture barrier is available on seats and ottoman cushion to create an impervious barrier between the upholstery cover and cushion, specify (**MB**). See upcharges. Moisture barrier is not recommended with coated textiles (vinyl, silicone, polyurethane, etc.) and **may not be specified** when sealed seat seams are selected.
  - Available to specify with two textiles, one for the seat cushion and one for the back (see model image). For pricing, start with the base price and add both back graded textile upcharge and seat graded textile upcharge.
  - The Blended Textile matrix does not apply to this series.
  - Nourish is covered under Global's 12-yr, 24/7 warranty. Textiles with a minimum of 100,000 double rubs must be specified.

PRIMACARE SLEEPERS

model GC3610SW

model GC3610SW pulled out

STANDARD FEATURES

- Primacare sleepers are ideal for space-constrained lounges and patient rooms providing sleeping space for one to two people. With zero wall clearance required, the sleeper is easy for one person to open and close. It is part of the Primacare healthcare collection for coordination of design across environments.
- Single unit sleep surface available in 24.5"W x 77"L (GC3610SW) and 30"W x 77"L (GC3610XW). Double unit (GC3610D) has two independently operated 24.5"W x 77"L sleep surfaces, each with standard underseat storage.
- Sleeper extends by pulling castered storage forward.
- Models are standard with four Black locking 3" dual wheel hard surface casters (C83R) to support the arm frame, and with non-locking casters to support the pull-out storage compartment.
- Tapered wood legs (WOD) are optional; available in all Global wood finishes, see upcharge. Non-locking casters remain on the pull out.
- Models are standard with Urethane, easy grip forward extending armcaps.
- Wood (WOD) and solid surface (CO) armcaps are available, see upcharges.
- Armcaps are securely fastened with metal-to-metal connectors and are field replaceable.
- Seat and back offer a 3.5" thick dual density ultra cell foam cushion for enhanced long term comfort.
- Seat cushion has a seamless waterfall front edge.
- Two concealed fabric pull tabs are located at the top of the back cushions. These allow the extended sleeping platform to be easily returned to a seated position.
- A Black, phenolic tablet arm with spill collector groove is available. Specify right (RT), left (LT) or both sides (TB) of the chair. See upcharges. Each tablet adds 4" to the width of the chair. Tablet requires 5.5" of clearance to operate. The tablet pivots for use and stores by lifting gently and rotating down to the side of the chair.
- Models may be specified with contrasting fabrics. Specify seat and back cushions separate from arms and front foot rail. For pricing, start with the base price and add both back/seat graded textile upcharge and the arms/front rail graded textile upcharge. *Note: the blended textile matrix is not applicable to this series when specified as noted above.*
- Carded healthcare textiles with a minimum of 100,000 double rubs must be specified to meet Global's 24/7 warranty coverage. For healthcare textiles, visit the website at [globalfurnituregroup.com](http://globalfurnituregroup.com).
- When specified with approved, non-healthcare Global carded textiles, Global's limited lifetime warranty for 8hr, 5 days/week use applies.
- Warranted to support up to 350 lbs. active weight capacity per seat.
- Shipped fully assembled.

INFECTION CONTROL AND BED BUG

RESISTANCE OPTIONS

- Several optional features are available for improved cleanability, to control moisture, and to reduce the risk of bed bugs.
- For woven textiles without a moisture resistant coating or backing, a moisture barrier (MB) is available to minimize moisture penetrating to the seat cushion. Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- For approved coated textiles (i.e. vinyl, silicone), sealed seams are available. Specify (SWZ) for sealed seams and waterproof zipper to prevent moisture or insects from penetrating seat and back cushion, see upcharges. For sealed seams on arms specify (S3), see models for upcharges.
- Note: minor puckering is common with the addition of sealed seams due to material buildup at corners.
- Underside of seat is standard with a coated lining (CL). For added protection and bed bug resistance, a sealed staple strip on the underside of the arms is available. Specify sealed lining (SU), see upcharge.
