model C2020LA
Medium Back Single Seat with Arms,
Freestanding

model C4T20T
Rectangular End Table, Freestanding

Two Textile Application

model C4030LA
Medium Back Bariatric Single Seat
with Arms, Freestanding

For Comprise Modular components, see page 83

STANDARD FEATURES

- Comprise series features a refined, modern design with versatile freestanding and modular guest seating. The series achieves high durability with nylon arms and legs on a metal rail structure; engineered for rigorous healthcare and high-traffic environments, it maximizes long-term value with fully replaceable and field reconfigurable components, ensuring a significant return on investment.
- Freestanding models: The series includes 1, 2 and 3 seat freestanding chairs and benches; freestanding combination models including 1 and 2 seat models with 10" table tops; bariatric chairs and benches; and, freestanding tables to complement the series.
- Freestanding models are shipped fully assembled.
- Modular components: The series offers all components required to build endless runs of seats, benches and connecting tables within the parameters outlined. See Comprise Modular on page 83 for components, planning and specifying.
- Chair backs are upholstered, molded foam, available in high or medium back heights. Backs have replaceable upholstery covers with zippered bottom seams. Zippers are standard with tabs removed. A waterproof zipper is standard when sealed back seams are specified.
- Seats have a seamless, waterfall front edge, with highly durable, molded high density foam and include an underseat, water resistant, coated lining (CL). For added security and infection prevention, order sealed lining (SU), see upcharges. The sealed lining option seals the staple strip making it tamper resistant and leak proof.
- For use with approved coated textiles (vinyl, silicone, polyurethane), optional sealed seams are available to mitigate liquid penetration at seams. Specify (SWZ) for back sealed seams with waterproof zipper, and (SE) for sealed seat seams, see upcharges. *Note: minor puckering is common with the addition of sealed seams due to material buildup at corners on seats and backs to mitigate liquid penetration at seams.*
- For moisture barrier on seat, specify (MB). Moisture barrier is not recommended with water resistant textiles and may not be used in conjunction with sealed seams.
- Offsets and cleanout around all sides of seats simplify cleaning with easy to wipe surfaces and reduced number of materials used for simplified cleaning and infection control.
- Glass filled nylon, easy to grip loop arms and legs offered in 5 different colors.
- Painted metal rails match arm and leg finish.
- An optional matching painted metal armless rail shroud is available to cover the set of rails, visible between the seats in multi-seat, armless configurations. The shroud provides a single, cleanable surface across the rails. Specify (ARS), see upcharges. The armless shroud can also be field installed on existing layouts (specify modular model C4PRSN).
- Standard with color matching nylon glides (ST), suitable for most surfaces. Natural nylon, non-marking glides (NM) are also available.
- Matching wallsaver feet (WS) are optional on freestanding seating and benches. Upcharges vary, see model. Freestanding models receive two wallsaver feet. Please note, with wallsaver glides on chairs, there is an additional 1.3" in depth on medium back models, 0.88" on high back models. Specify color to match legs.
- Floor mount (FM) glides are optional in Black only. Upcharges vary, see model.
- Table tops are standard in thermally fused laminate (TFL). High pressure laminate (HPL) and Solid Surface (CO) are also available. Upcharges vary, see model.
- Tamperproof fasteners (TP) are optional on all models. Upcharges vary, see model.
- Seating models may be specified with contrasting fabrics. Specify seat cushion separate from back. For pricing, start with the base price and add grade upcharges for both seat and back selections. *Note: the blended textile matrix does not apply to this series when specified as noted above.*
- For healthcare textiles, visit the website at globalfurnituregroup.com.
- Comprise is covered under Global Healthcare 12 year, 24/7 warranty when upholstered with approved healthcare textiles.
- Can be upholstered in standard Global textiles if healthcare compliance is not required.
- Warranted to support up to 400 lbs. active weight capacity per seat for standard size seating and 600 lbs. for bariatric seating.
- Power/charging units are specified separately for field installation. See Comprise Modular on page 83. Each unit includes a tamper resistant simplex, USB-A and USB-C charging ports. Choose undermount or clamp-mount for use under/on tables and table tops. Available Black (B) or White (W) with 10' long cord. Connecting tables and end tables are pre-drilled for undermount power attachment.

Add option codes in the following order:

- **Model number**
Specify model number.
- **Back textile**
Specify textile code. See model grade upcharges.
- **Seat textile**
Specify textile code. See model grade upcharges.
- **Leg, Arm, Rail finish**
(BLK) Night (SHW) Shadow
(FOG) Fog (TOA) Toast
(LAB) Latte
- **Armless Rail Shroud** (matches rail finish)
(NRS) No rail shroud.
(ARS) Armless rail shroud. Add \$161.
- **Glides**
(ST) Color matching Nylon glide for most surfaces.
(NM) Non-marking glide. No upcharge.
(FM) Black floor mounted glide. Upcharges vary, see model.
- **Wallsaver Foot**
(NWS) No wallsaver foot.
(WS) Wallsaver foot. Upcharges vary, see model.

- **Fasteners**
(RS) Standard fastener.
(TP) Tamperproof fastener. Upcharges vary, see model.
- **Back seams**
(NS) No sealed seams.
(SWZ) Sealed seams with waterproof zipper. Upcharges vary, see model. Contact CustomerCare for approved textiles.
- **Seat seams**
(NS) No sealed seams.
(SE) Sealed seat seams. Upcharges vary, see model. Contact CustomerCare for approved textiles.
- **Seat underside**
(CL) Coated lining.
(SU) Sealed lining. Upcharges vary, see model.
- **Moisture Barrier** (seat only, not available with sealed seams)
(NB) No moisture barrier. No upcharge.
(MB) Moisture barrier. Add \$100 per seat. For bariatric models, add \$150 per seat.
- **Table Surface Type**
(TFL) Thermally fused laminate.
(HPL) High pressure laminate. Upcharges vary, see model.
(CO) Solid surface. Upcharges vary, see model.
- **Top finish (TFL or HPL)**
(ACJ) Absolute Acajou
(ASN) Asian Night
(AWC) Avant Cherry
(AWH) Avant Honey
(BLK) Black
(BZD) Blizzard
(BRC) Brushed Cobalt
(CMB) Clear Maple
(CGY) Custom Grey
(DES) Dark Espresso
(DWT) Designer White
(FAS) Fashionista
(FCL) First Class
(NBL) Noce Biondo
(NGL) Noce Grigio
(NEL) Noce Leggero
(NML) Noce Medio
(QTM) Quartered Mahogany
(SBY) Sheer Beauty
(SDT) Stonedust
(SOG) Storm Grey
(WHE) Walnut Heights
(WHC) White Chocolate
(WCR) Winter Cherry
- **Top finish (solid surface)**
Grade 1:
(SWH) Designer White
Grade 2:
(SBT) Beige Tempest
(SBX) Black Onyx Mirage
(SMG) Milk Glass Spectra
(SFW) Frosty White Mirage
(SHS) Hot Stone
(SNM) Northern Melange

COMPRISE MODULAR

STANDARD FEATURES

- Comprise series features a refined, modern design with versatile freestanding and modular guest seating. The series achieves high durability with nylon arms and legs on a metal rail structure; engineered for rigorous healthcare and high-traffic environments, it maximizes long-term value with fully replaceable and field reconfigurable components, ensuring a significant return on investment.
- For standard features and option descriptions, see Comprise pg. 73. To see each modular component specification options, please refer to the [build-it feature](#) on the website.

Modular Components

- The series offers all components required to build endless runs of seats, benches and connecting tables within the parameters outlined.
- Modular components are shipped separately for field assembly.
- The modular design is based on rail sizes, determining number of tops (seat & back, bench seat and/or table top) that they support.

Modular Structural Components

- Rails are available in 11" modular lengths, from 22" to 66". Rails are non-handed. Each rail assembly includes two rails (front and back) and requires legs to support each end (end leg or center connecting legs). Specify finish to match legs.
- End legs, end legs with arms, center connecting legs and center connecting legs with arms are non-handed and shipped with hardware to attach the units to rails. Specify finish to match legs.
- Center connecting tables are available in either 10" or 22" widths. These kits include rails, tabletop and hardware. They connect between center connecting legs only. Specify rail finish to match legs.
- 90- and 120-degree center connecting tables are corner tables. They include rails, corner leg and corner tabletop with connecting hardware. Corner connecting tables connect between center connecting legs only. Specify rail and leg finish to match adjacent legs.
- Bariatric single seat tops and bariatric benches include rails and must mount between end or center connecting legs. Specify rail finish to match legs.

Rail-Mounted Components

- Single seats and single bench seats include attachment hardware to mount on rails (specified separately). Seats are shipped preassembled with back attached to seat.
- Center arm (C4PCA) mounts on rails between rail-mounted single seats, benches and tables. The arm is non-handed and includes hardware. Select finish to match end legs and rails.
- 10" and 22" single table tops, no rail (C4PT10R and C4PT20R) mount to rails. 10" table tops mount on either end of a 32" rail or centered on a 54" rail only. 22" table tops mount along rail in standard seat locations. Attachment hardware is included.

- Armless rail shrouds (C4PRSN) attach to the rail between rail-mounted components where a center arm is not desired. The shroud is not required, but recommended to cover the rails visible between components to provide a cleanable surface between components. Specify finish to match rail.

Specification Steps for Comprise Modular

Plan the layout:

- Determine length of run(s) required. Comprise rails are based on 11" increments, with lengths starting at 22" up to 66"; supporting 1, 2 and 3 seat positions. 32" and 54" rail lengths support a combination of one or two seats or benches with 10" tables.

Specify Legs and Rails:

- Beginning a run with an **end leg**: legs and arms are non-handed; specification can begin from either end of run. Specify the end leg (with or without arm).
- Beginning a run with a **connecting end table**: end tables are non-handed; planning can begin from either end of a run. Specify the end table, then specify a center connecting leg (with or without arm).
- Specify a rail of desired length. Select the appropriate length of rail needed for seating, benching or tabletop sections. Specify rail finish to match leg finish.

Connecting Rail Sections:

- **Required**: a center connecting leg with or without arm must be specified to connect one rail to another. Connecting legs and arms are non-handed. Specify finish to match rails and legs.

Spanning Rail Sections with Connecting Tables:

- Center connecting tables include rails. Support the end of rail by first specifying a center connecting leg. Next, specify either a 10" or 22" center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

Corner Connecting Tables:

- 90- and 120-degree center connecting tables include rails. Support the end of the rail by first specifying a center connecting leg. Next, specify either a 90 or 120 degree center connecting table. Then specify a center connecting leg before continuing the run with additional rails.

Modular Bariatric Seats and Bariatric Benches:

- Bariatric seats and benches include rails and may be positioned at end-of-runs or mid-run. Bariatric modular units must be used in combination with their supplied, unique rails and require legs on either end (end legs or center connecting legs).

Ending the Modular Run:

- To end a run, specify an end leg (with or without arms) at the end of the last rail.
- To end a run with a connecting end table, first specify a center connecting leg (with or without arms) at the end of the last rail, then specify the connecting end table.

Rail-Mounted Components

- Single seats, single benches, 22" table tops and center arms are available to specify on top of rails. Each module can be placed along the rails at 22" increments. Center arms mount between rail-mounted components. Center arms cannot mount at ends of rails.
- 10" table tops mount on ends of 32" rails or centered on 54" rails.

Final Details:

- Wallsaver foot is optional on all modular leg assemblies and recommended when seating is configured against a wall.
- Armless rail shroud, ordered separately (C4PRSN) is recommended to cover rails visible between seats, benches and tables wherever rail-mounted center arms are not used.
- Undermount and clamp mount power units may be specified for use on tables. Connecting tables, rail-mount tables and end tables include pre-drilled holes for undermount power.
