Priva acoustic pods provide a place for personal privacy, focus and online collaboration, away from the noise of the open office. Integrated ventilation and low-voltage LED lighting are motion-sensor activated to reduce energy consumption. The tempered glass entrance door, in combination with optional glass back panel, reduces the sense of confinement. Interior carpet flooring is comprised of eco-friendly nylon fiber, solution dyed with a polypropylene backing.

A laptop shelf, two AC outlets and two USB-A charging ports support the range of today's electronic and communication devices. The exterior is available in a variety of laminate finishes to coordinate with other furnishings. The interior can be finished in laminate or PET, for industry-leading sound absorption. Hinge and handle trim is available in Black or anodized Silver. Mechanical fasteners to affix the pod to the floor are available.

ELECTRICAL

- Power and data lines can enter Softpod via floor, ceiling, or through grommet in the divider. The grommet opening is built into every Softpod divider at a specific location, but it is covered by an on-site removable PET plug.
- A grommet on a single Softpod can also facilitate cable access to a wall outlet.
- Grommets installed on specific dividers facilitate passage of wires through Softpod dividers into adjacent Softpods.
- Orientation of worksurfaces plays an important role when planning Softpod cluster layouts with the need to pass cables between individual Softpods as the cables are best hidden underneath.
- Worksurfaces must have opposing alignment.
- Align units in cluster plan option unit type & orientation.
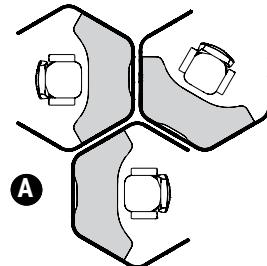

(**A**) Worksurfaces must have opposing alignment.

Connecting Application
- Ceiling pole attaches to the divider grommet under worksurface.
- Location of the ceiling pole on the inside of the Softpod is determined by the contoured recess at the back of worksurface.
- White dots below indicate possible ceiling feed pole location within the Pod (must be at the same location as worksurface contoured recess).
- Grey dots indicate possible Ceiling feed pole location outside of the Pod (because cables pass through
  the divider grommets and under the worksurface).
- Black arrows indicate possible power and data cable passage between Softpods (because cables pass through the divider grommet under the worksurface, through the second divider grommet and into the adjacent Softpod, under worksurface.
- In either case, the cables enter or exit the Softpodthrough the divider grommet.
