To obtain a GREENGUARD Certificate for any product, please go to the product page on our website www.globalfurnituregroup.com and click on "View GREENGUARD Certificate".

level™ certification, based on the ANSI/BIFMA e3-2012 furniture sustainability standard, sets furniture manufacturers on a path toward greater sustainability over time. Based on environmental and social criteria set forth in the standard, a product's entire supply chain is assessed.

Certification assessment includes an evaluation of specific corporate policies and guidelines and an assessment of associated company manufacturing facilities. Products must meet quantifiable milestones of environmental and social performance at every step of development.

The quantitative assessment addresses four categories: material use, energy and atmosphere impacts, human and ecosystem health and social responsibility.

Manufacturers earn points in each of the four categories. The level™ brand and its numeric rating of 1, 2 or 3 indicate what threshold of certification a product has achieved. level™ 3 is the highest rating.

How do I buy a desk?

Choose a non-reflective surface. Global uses colors that reduce glare to make your work easier to read while reducing eye strain.

Get a desk that lets you look ahead. A modular desk is easy to set up initially and then reorganize or reconfigure later to adapt to future needs.

Look for European connectors if you're buying ready-to-assemble furniture. Global makes assembly easy - all you need is a screwdriver.

Give your business an edge. Each Global desk comes with its own attractive edge design.

Avoid tangles. Make sure your desk has at least one grommet hole to keep computer and telephone wires out of the way.

A hutch should have a sweep that manages computer and telephone wires.

Island worksurfaces let you meet with more than two people at once with ample leg room for all.

Choose one of Global's height/angle adjustable keyboard trays to go with your desk. Your arms can maintain a comfortable position, reducing shoulder, back and neck strain.

How do I select the right workstation?

When searching for the right workstation it is important to consider its purpose which will be decided by the nature of your tasks. It is best to look for products that have been designed and engineered to help make your workspace more productive.

This can be achieved in a variety of ways. As a guide, observe how your work flows through your office in a typical day. It is likely that you'll uncover a number of distinctive and repetitive task patterns.

Once these patterns have been identified, organize them according to their intended use and frequency of their use. Now you are ready to investigate the pertinent factors that will determine the workspace you eventually select.

Lighting - Protect yourself

- If you have to setup near a window make sure your computer sits perpendicular to it, minimize eye-strain inducing glare on sunny days.
- If you have fluorescent lights, try to position your set up between the lights.
- Use "Parabolic louvers" to reduce the glare from fluorescent lights
- Use window blinds to control the light source through the day
- Panels or screens may be used to control glare
- Protect your eyes from Ultraviolet A (UVA) and Ultraviolet B (UVB) by using an anti-glare screen

Noise

- Try to set up your office in a separate room if possible and away from the rest of the house

Chair

- Comfort is personal but should be part of the selection
- Seat pan design; deep and wide enough
- Rounded front edge (waterfall)
- Adjustable slope seat
- Able to adjust your chair, to obtain appropriate height
- Sit back in your chair, with your thighs parallel to the floor
- Place feet flat on the floor, a footrocker may be required

Footrocker

- A footrocker helps to prevent possible discomfort resulting from outstretched feet
- The rocking motion creates light activity in the legs and feet and will help stimulate muscles to improve overall circulation

Keyboard

- Has a palm rest
- Easily adjusts the angle of the keyboard
- Easily adjusts the keyboard height

Document Holder

- A curved back document holder reduces glare
- Position document holder in line with the monitor to reduce eyestrain

Monitor

- There should be a direct line from the center of monitor to the, "J" key on your keyboard which should line up with your belt buckle
- Position the monitor at arm's length
- Make sure that the top of your monitor screen is slightly below eye level
- A monitor stand may be used to achieve the desired height

Workstation

- Adequate space beneath the worksurface for your legs
- Depth of the worksurface depends on the task and equipment used to perform this responsibility
- Try to place tasks that are performed regularly within arm's reach
- Avoid unnecessary reaching and bending which leads to fatigue and possible muscle strains and can reduce efficiency
- Keep in mind other related tasks in your planning
- Establish your workflow then design the essential elements to meet your requirements

LAMINATE DESK NOTES

The following applies to all series EXCEPT the Bridges II and Princeton series.

For information on the Bridges II series, please refer to page 382 and for the Princeton series, please refer to page 127.

- Outside and surface panels are made from 1" thick 45 lb. density particle board and covered on both sides with high performance thermally fused laminate. Modesty panels are 11/16" thick.
- **BOX AND FILE DRAWERS** use FULL EXTENSION STEEL BALL BEARING SLIDES for smooth action.
- **BOX AND FILE PEDESTALS** are standard and are CONSTRUCTED INDEPENDENTLY of the chassis, with fully closed bottoms. This PICTURE FRAME CONSTRUCTION technique prevents racking, and provides a product that lasts for years.
- **FILE DRAWERS** file both legal and letter documents as standard (LETTER FILES will file in BOTH DIRECTIONS, as will LATERAL FILES), except 15"w Zira units (side to side only).
- Drawers and END PANELS are **EDGE BANDED** on ALL FOUR SIDES to protect clothing and the floor covering.
- Locks are standard on all box and file pedestals, lateral files, storage cabinets and combination storage units.
- All locking components within each series can be keyed alike at no additional charge. Please specify the request at time of ordering.
- Drawers are opened with side pulls and are constructed 22" deep (Genoa 18"D) using French dovetail joints at the front and lap joints at the rear. Woodgrain enameled bottoms are routed into the woodgrain (MDF) sides on three edges.
- Full to the floor pedestal configurations can be switched for a **15% upcharge** (Adaptabilities series ONLY).
- Pencil tray included with each desk.
- **LEVELING GLIDES** are standard on ALL UNITS.

OFFICE SPACES - PLANNING

BASIC WORKSTATION

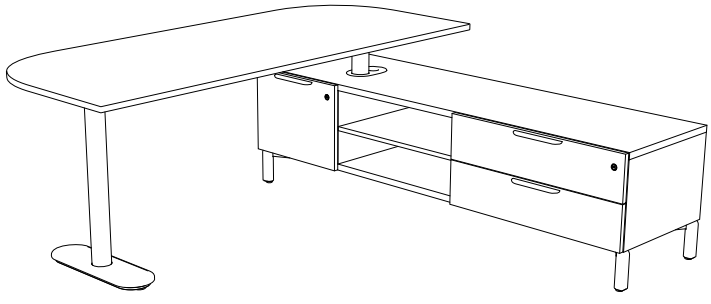

Office Spaces planning begins with the credenza, the storage undercarriage, the worksurface, the required support channels and the leg column kit type. The examples below feature fixed height leg column kits and all surface types in a right handed configuration, but any can be specified with height adjustable leg column kits and/or the opposite handedness.

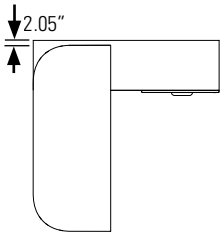

To support surfaces, specify the required leg column kit, the low storage with leg grommet and support channel bars for primary surfaces (single bar up to 66", two required for 72" and above) and a return support kit for return surfaces. Primary worksurfaces cannot rest directly on the low storage or as a freestanding table desk.

L-DESK SURFACES

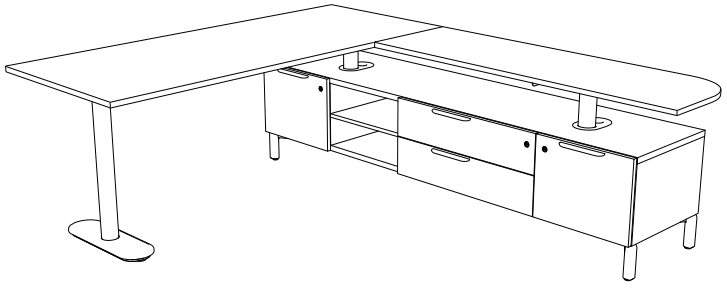

To specify an "L" shaped configuration with Office Spaces, a credenza with two leg grommet, a three column fixed or height adjustable kit, two support channels and a return support channel kit are needed. The examples below feature fixed height column kits, a basic rectangular primary worksurface with various return shapes available.

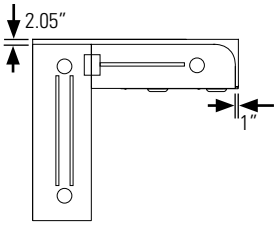

They can also be specified with height adjustable column kits and/or opposite handedness. The primary surface can be specified as any shape as shown on the previous page. To support surfaces, credenzas must be specified with two leg grommets. Surfaces cannot rest on the credenza.

STORAGE

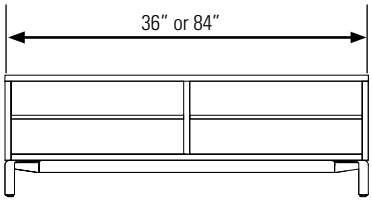

SKSLL Storage Legs for single units.

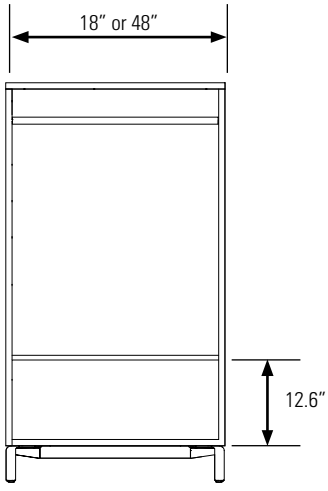

*Freestanding Storage 24 or 30"w use SKSLL.

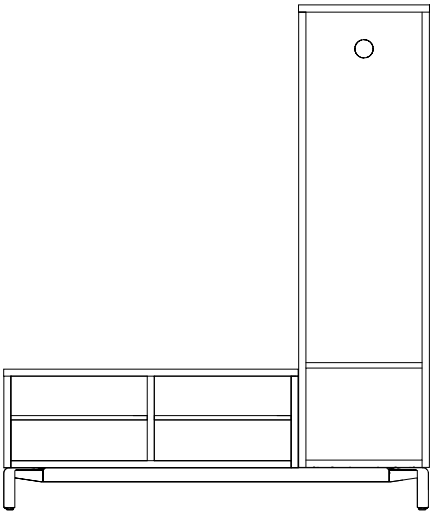

NOTE: High storage units of 24"w or less must be ganged with a low unit or anchored to the wall.

SKSLU20 Storage Undercarriage

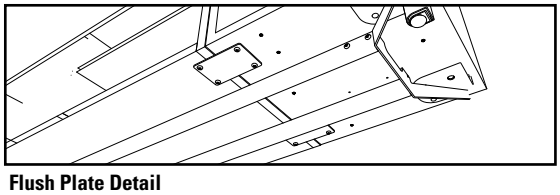

*Use SKSLU20xx for Low storage 36"w and greater and for all High Storage (18"-48"W). 18 & 24" wide high storage not intended to be freestanding units; must be ganged to another unit OR anchored to a wall or other fixed element.

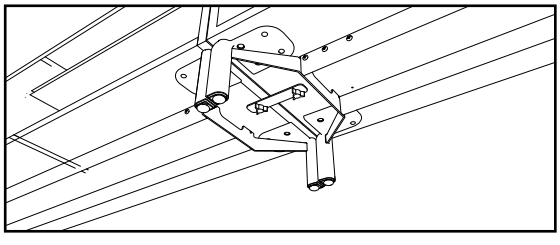

*Combining low and high storage is possible over a single undercarriage. No more than one low storage unit and one high storage can be combined on a single undercarriage.

18" and 24" wide high storage recommended for use in conjunction with low storage 36" wide or greater.

NOTE: All storage units have a recessed back of 1.29"

Flush Plate Detail
Flush plates (SKWSFP) are required when combining low and high storage over a single undercarriage.

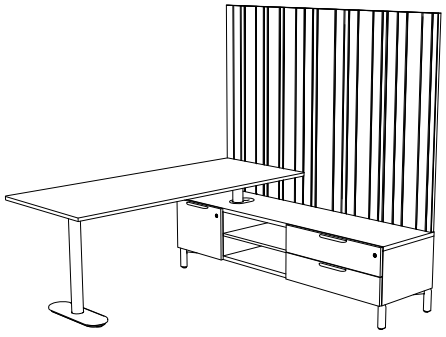

Ganging Clip Detail
A base ganging clip (SKSAGC) is recommended when positioning two separate undercarriage pieces side by side. The half-pill shaped legs align to form an oval column to emulate the curves seen through the Spaces Collection.

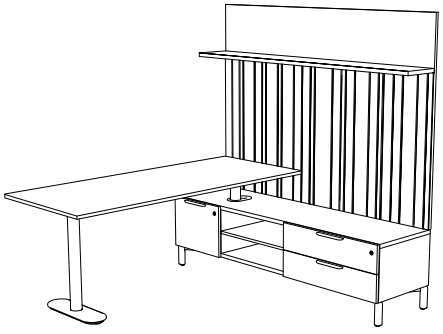

BACKBOARDS + OVERHEADS

Backboards add a decorative finished element to the space and with optional shelving or when used with overheads add personal storage options; they are wall mounted.
Backboards include rails for mounting; hardware to fix to the wall is not included.

Backboards are intended to be mounted with bottom flush to the top of 20" low storage and aligned to the top of high storage.
Backboards are available in laminate (**LP**), dry erase whiteboard (**DE**), PET felt (**PT**), and patterned PET felt (**VE**).

BEAM APPLICATIONS

D x W x H

Table supporting structures - BEAMS

Legs are connected with supporting beams. There is one beam for a single line of tables while two beams connect back-to-back table structures. Adjustable clamps at either end of the beam can be adjusted to accommodate the following applications in both single table as well as back-to-back table configurations.

STANDARD TABLE BEAM

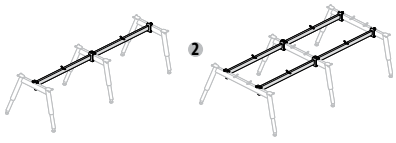

Single table beam application (1)

Designed to bridge two legs to form support for a single table, or for two back-to-back worksurfaces Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface.

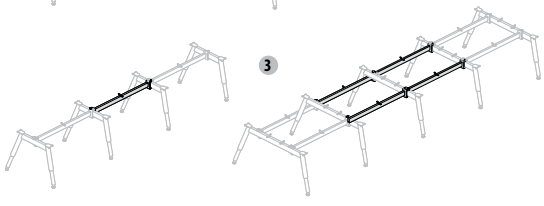

End of run table beam application (2)

Supports one table leg assembly tucked under the worksurface (one adjustable clamp pushed all the way in), while the other table leg assembly can be shared between two adjacent worksurfaces (adjustable clamp pulled out to extend the beam).

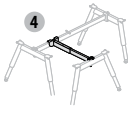

Interconnecting table beam application (3)

Supports both table leg assemblies extended to support adjacent worksurfaces on either side. Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface. Single table beam application supports single table leg assemblies with legs on both sides tucked under the worksurface.

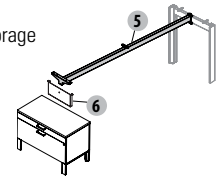

TELESCOPIC TABLE BEAM (4)

Supports a return connected perpendicularly to a 24" or 30" deep primary worksurface. The Telescopic beam is connected to a single or back-to-back leg on one side and to any-worksurface supporting beam on the opposite side. Telescopic beam clamp allows the table leg to be tucked under the worksurface or shared between two adjacent worksurfaces.

STORAGE TABLE BEAM (5)

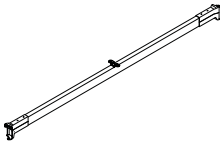

The Storage beam is connected to a single or back-to-back leg on one side and to the worksurface on the opposite side - thus saving one leg assembly. Assembly worksurface is connected to storage units with included storage brackets. Storage table beam's flexibility allows for a single table application (with the table leg tucked in under the worksurface) as well as for a double table installation (two adjacent tables supported by a shared leg in the middle and two storage cabinets at the opposite ends.

STORAGE TABLE BEAM ADAPTER (6)

Connects to a storage table beam. This assembly allows a worksurface to be supported by a leg on one side and a spine (formed by interconnected storage cabinets) on the opposite side.

Standard Table Beam

Standard Table Beam bridges two legs to form support for a single table, or two back-to-back worksurfaces. Adjustable clamps at either end of the beam accommodate **standard table beam, end of run and interconnecting table beam applications**. Adjustable brackets ship attached to the beam. Specify Standard Table Beam size corresponding nominally to the worksurface length. Includes all hardware necessary to connect to legs. Powder coated steel beam and aluminum cast clamps.

Storage Table Beam Adapter

Allows a worksurface to be supported by a leg on one side and storage spine on the opposite side. A typical storage spine is formed by series of Interconnected 21" or 25"h storage cabinets of corresponding depth. The 21" or 25" adaptors provide structural support, acting as supports between the top of the storage cabinet spine and the bottom of the perpendicular worksurfaces. The flexible leg/beam/adapter assembly arrangement allows the leg to be tucked in under the worksurface or to be shared by two adjacent worksurfaces. Specify Storage Beam nominally 18" shorter than worksurfaces for storage spine support application. Specify **BRTSA21** or **BRTSA25** depending on height of storage units forming the spine. Includes all hardware necessary to connect the adapter to the beam, worksurface and storage spine.

POWER DELIVERY / CABLE MANAGEMENT

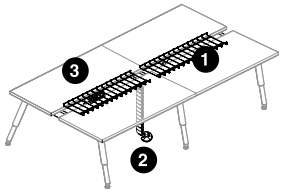

D x W x H

At the basic level, table and floor based office equipment is serviced by a wall or floor power supply. As the operation grows, there might be a need to organize excessive cable clutter.

Wire Basket (1) connects to the underside of worksurfaces with sprig brackets, and cables are simply dropped and coiled into them. *Wire Basket is not to be used with power troughs.*

Cable Snake (2) Installed in proximity of floor monument to manage vertical cable clutter..

Table clamped, single circuit **Desk Top Power Data Modules (3)** deliver services to desk height, while tapping into wall or floor power supply. Again, the excessive cables can be managed with Cable Trays.

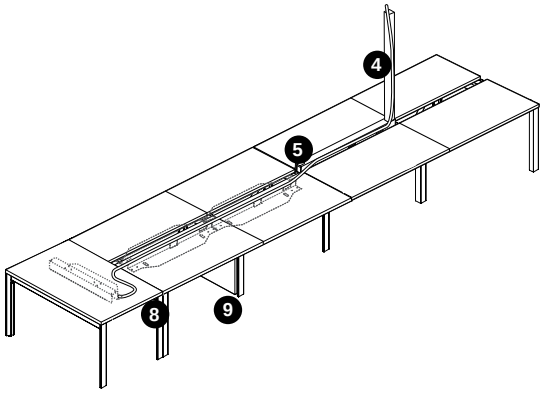

Ceiling pole **BRTCPP (4)** manages power and data cables between ceiling and above or below worksurface power troughs.

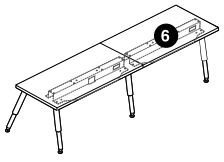

Above and Below Worksurface Power/Data Troughs (5) can be installed between back-to-back tables for extended below and above desk height power/data distribution. 8 wire, 4-circuit system. (2 + 2 circuit configuration)

NOTE: Specify **BRTHH58 (8)** to distribute power from double-sided, back-to-back below worksurface power trough to a single-sided, below worksurface power trough at the end of a table run.

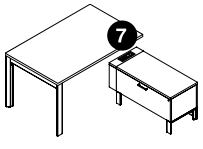

Leg shroud (9) attaches to 34"w legs and manages power floor feed, as well as data cables from floor monument.

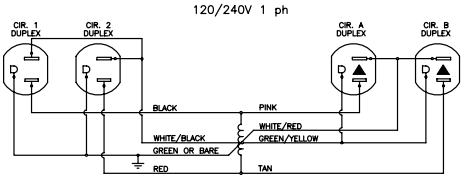

Single Sided Power/Data Troughs (6) can be installed to the underside of a single table.

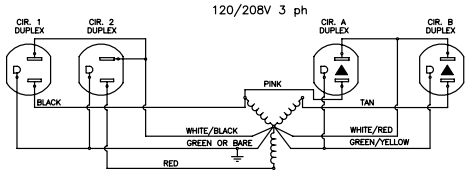

Storage power/data box BRTVCM (7) attaches to storage units and provides access to one duplex/data terminal on top storage surface. Integrated single circuit module can be plugged to floor monument under the storage or to a wall outlet

Starter Beam

Starter beam can serve as a single, standalone unit or the beginning of a longer run of interconnected beams. 30" to 72" wide beams feature knockouts for two electrical duplex and one communication face place on each side while 24" wide beams accommodate one electrical duplex and one communication face place on each side. The leg expands by approximately 4" in height to compensate for uneven floors and allow for accurate leveling. Feet depth is 24". Starter Beam consists of horizontal channel, raceway covers, two legs, two 24" deep feet, two vertical end trims and corresponding end trim capture strips. Specify standard Flat Top Trim (**BRPBTC**), Glass and top trim kit (**BRPBEG**), or PET felt and top trim kit (**BRPBEF**) separately. Specify electrical components separately.

COLLABORATIVE SEATING

D x W x H

Bridges collaborative seating collection consists of seating, privacy screens, tables, tablets and power. It is a versatile modular furniture series which can be configured into many space planning scenarios, including corner, in-line, open concept, traditional reception, as well as secluded seating with high privacy partitions.

Furniture pieces can be used as stand alone items or can be mechanically linked together to form a variety of seating configurations.

Seat and backrest can be integrated with Bridges tables.

Corner tables and in-line 6" table modules double as power delivery centers.

Dedicated seat backrests feature dual USB charging port.

Some inline 6" table modules are furnished with grommets to support tablets.

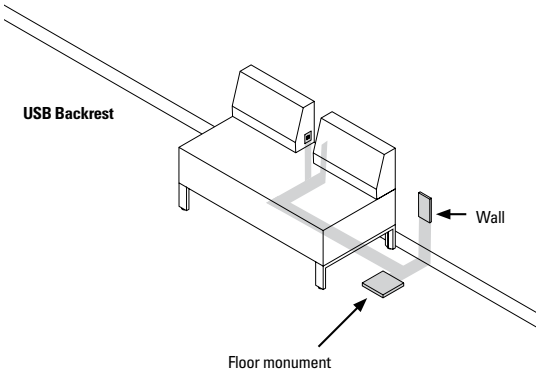

Legs are available in standard Bridges metal painted finishes and anodized aluminum finish.

Bridges Collaborative Seating upholstery features a single stitch, thick white thread around the edges. The white, wide stitch along with crisp corners are part of its distinctive personality. In order to achieve crisp edges and to minimize "pillow" effect caused by taut fabric, the upholstery material has been applied deliberately loose, which may over time, produce puckering of the upholstery surface material. This can be easily corrected by stretching the fabric by hand or during vacuuming.

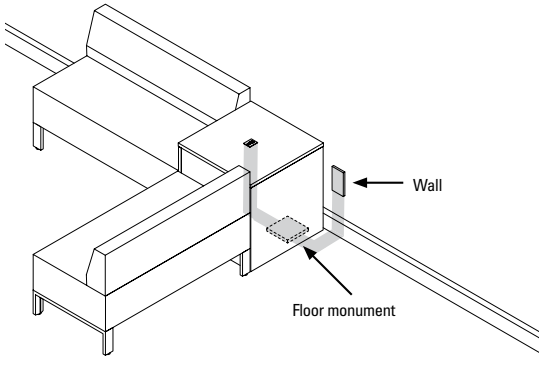

In order to efficiently utilize fabric yield, all 60" seats and backs feature a seam in the middle. The double stitch seam is sewn with a thin thread, closely matching the upholstery material in color.

Some complicated fabric patterns prevent pattern matching and will be upholstered without the seam at the discretion of the factory.

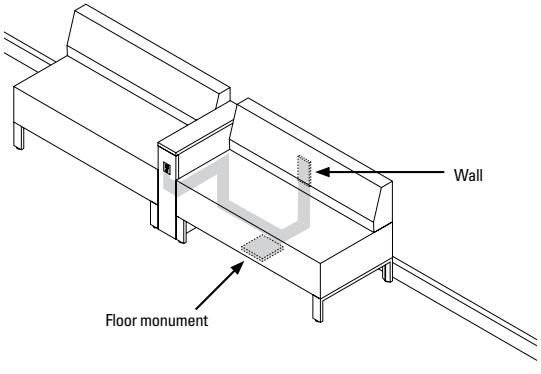

Should you require no middle seam by cutting into the roll, please specify "NO SEAM" at time of your order.

- Power and data lines can enter Softpod via floor, ceiling, or through grommet in the divider. The grommet opening is built into every Softpod divider at a specific location, but it is covered by an on-site removable PET plug.
- A grommet on a single Softpod can also facilitate cable access to a wall outlet.
- Grommets installed on specific dividers facilitate passage of wires through Softpod dividers into adjacent Softpods.
- Orientation of worksurfaces plays an important role when planning Softpod cluster layouts with the need to pass cables between individual Softpods as the cables are best hidden underneath.
- Worksurfaces must have opposing alignment.
- Align units in cluster plan option unit type & orientation.

BUNGEE™ TABLES

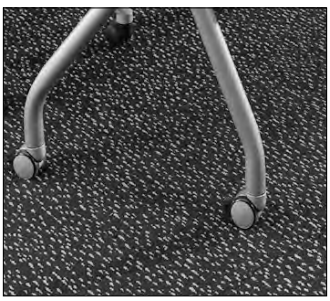

Bungee is a series of freestanding tables and accessories designed for classrooms, training rooms, boardrooms and any other multi-functional space that may require frequent configurations. Tables are sold complete with legs and Bungee cords so they may quickly and easily be connected together without searching for tools or worrying about loose parts.

Bungee tables feature rounded corners with a unique "bubble molding" that is engineered to compress under the tension of the Bungee cords. The compressed molding creates a seal that serves to locate and align interconnected tables while also providing a soft and forgiving edge.

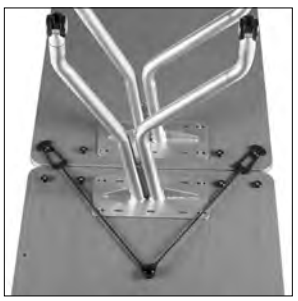

Choose from a variety of top shapes and laminate finishes to create your individual style. In addition, most tables offer a choice of tapered legs or spider legs in a Tungsten or Black finish with adjustable levelers or optional casters. Optional modesty panels, grommets, wire management and power blocks further enhance your workspace.

Flip-Top tables can be nested and easily stored by activating the single hand release mechanism from the left or right side.

Optional locking casters are available in Tungsten or Black (standard on Flip-Top models).

BUNGEE SL™ - NOTES

GENERAL INFORMATION

- Introducing Bungee SL - a product line to complement and coordinate with the top selling Bungee training tables series.
- Bungee SL takes the popular aesthetic of the Bungee series and allows tables to be specified in shared leg and permanent applications - great for benching, training, teaming and academic areas.
- Bungee SL tops and legs are sold separately, increasing the flexibility of the product in the future and allows for space saving in areas where real estate is a premium.
- High pressure tops are available in all Bungee SL laminates at an extended lead time - please refer to model # for pricing.
- For environmental certifications, please visit globalfurnituregroup.com

CONSTRUCTION

- Tops are 1" thick thermally fused laminate (**TFL**) or optional 1-1/16" thick high pressure laminate (**HPL**).
- All laminate components are made of 45 lb. density particle board with high performance thermally fused laminate surface or high pressure laminate surface with a kraft paper backing.
- Tops 60" and over feature a built-in support bar. The support bar is 10" from the **approach** side, and clearance to the bottom of the support bar is 27" from the floor.
- **BUNGEE CORDS ARE NOT INCLUDED AND ARE NOT COMPATIBLE WITH BUNGEE SL TOPS**

EDGE DETAIL

- Bungee SL comes with a choice of four edge styles:

A3 - square corner, standard edge

AR - square corner, bicut edge

AS - square corner, Silver

AB - square corner, Black

BS - rounded corner, Silver

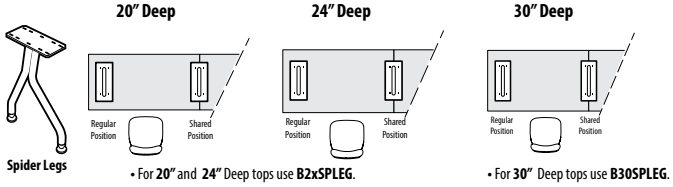

BB - rounded corner, Black

- **BB/BS** - Bungee bubble edge: unique "bubble" molding found on original Bungee
- **AB/AS** - Split color PVC edge: edge matches split color aesthetic of the bubble edge, but allows for 90 degree corners and a cleaner look.
- **A3** - 2mm preferred matching edge. Coordinates well with Adaptabilities and Zira 1" tops.
- **AR** - Bicut edge. Coordinates well with Adaptabilities and Zira 1" tops.

LEGS

- Two leg styles are available: tapered and spider leg. Available in Black (**TBL**) or Tungsten (**TTU**) finish, please specify. For added durability, paint finish is textured. Levelers are standard; casters are not available for Bungee SL legs. Levelers adjust 3mm - 10mm in height.

Working Edge (1) - Edges designated with the letter "**W**" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in free-standing applications.

Connecting Edge (2) - Edges designated with the letter "**C**" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End Edge (3) - Edges designated with the letter "**E**" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90˚ crescent tops can be freestanding if the optional center leg is added.

FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs; **connecting tables** are defined as more than one work surface supported by a single leg at each point of connection. The rule for determining the quantity of legs of an open configuration is the number of worksurfaces plus one **(See Figure 1)**.

On closed configurations, the number of legs is equal to the number of worksurfaces **(See Figure 2)**. There are some exceptions, such as when optional third legs are used on quarter round or 90˚ crescent shapes.

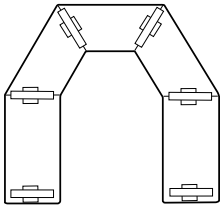

Figure 1. Open Configuration
Number of Surfaces = 5
Number of Legs = 6

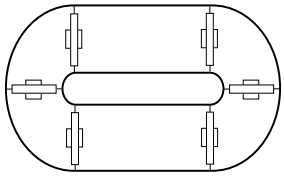

Figure 2. Closed Configuration
Number of Surfaces = 6
Number of Legs = 6

FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables **(Figure 3)**.
- When Trapezoid tops are freestanding, legs must be on the outer left and right sides **(Figure 4)**.
- 90˚ crescent work surfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added **(Figure 5)**.
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable **(Figure 6)**.
- **DO NOT DRAG TABLES WHEN RE-CONFIGURING.**

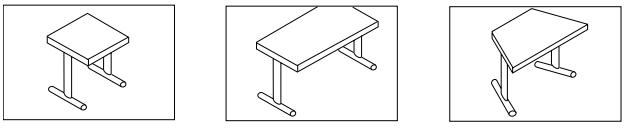

Figure 3 - Freestanding Tables

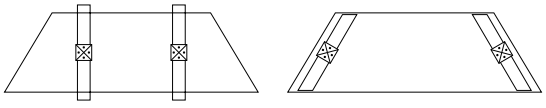

Figure 4 - Trapezoid Tops

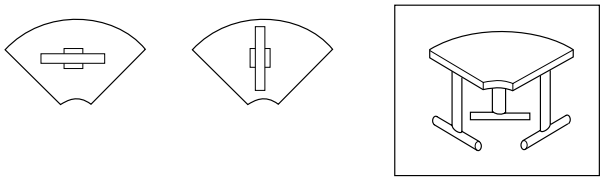

Figure 5 - Adding a Third Leg

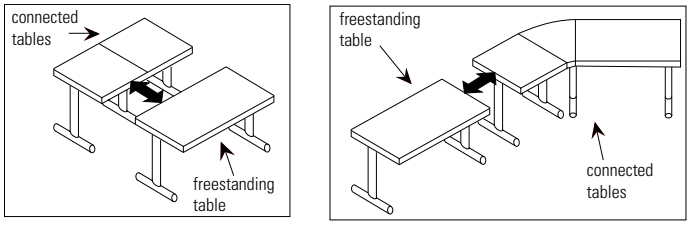

Figure 6 - Ganging with Connected Tables

CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24"D, 30"D or 36"D) can be connected with one leg, at the connecting or end edges **(Figure 8).**
- Half round work surfaces can be used in the following ways: They must be of equal width when connected to each other **(Figure 7)** or the connecting shapes must be equal to half the width of the connecting half round **(Figure 8)**.
- ConnecTABLES® is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90˚ to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use **(Figure 9)**.
- Quarter round and 90˚ crescent work surfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round work surfaces, it is recommended that configuration "A" be used since the outside end of the center leg in configuration "B" is almost flush with the outside edge of the worksurface. If configuration "B" is installed against a wall or where there will be no traffic flow, then configuration "B" can be used.

CONNECTABLES® - PUTTING IT ALL TOGETHER

Legs are fastened to worksurfaces utilizing a steel-to-steel connection. Each leg comes equipped with four ¼" x 7/8" machine screws. Screws are inserted through the four oval shaped holes only. Do not use wood screws! When fastening legs to work surfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs**.

FREESTANDING TABLES

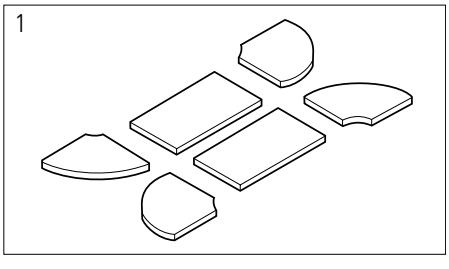

1. Turn work surface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four ¼" x 7/8" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

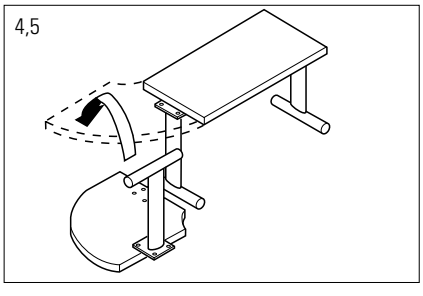

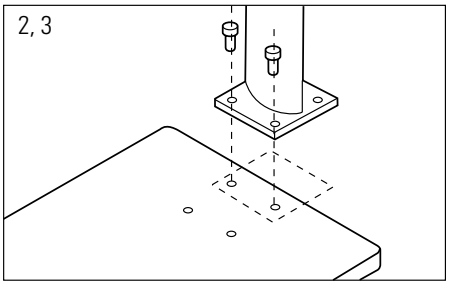

CONNECTING TABLES

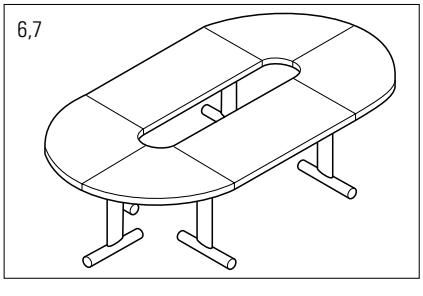

1. Determine approximate location of desired configuration in room and turn work surfaces upside-down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first work surface. Fasten leg with two ¼" x 7/8" screws.
3. Repeat step 2 and 3 on the opposite edge of the first work surface.
4. Turn table right-side up.
5. Turn table right-side up and fasten to the previous top from the underside.
6. To add additional work surfaces repeat step 6.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.

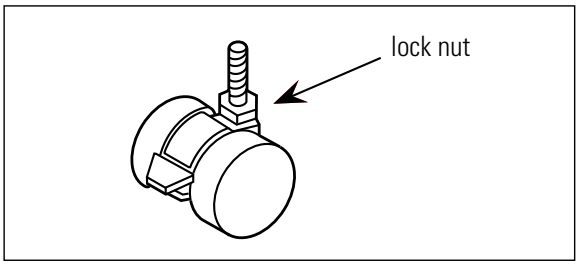

OPTIONAL CASTERS

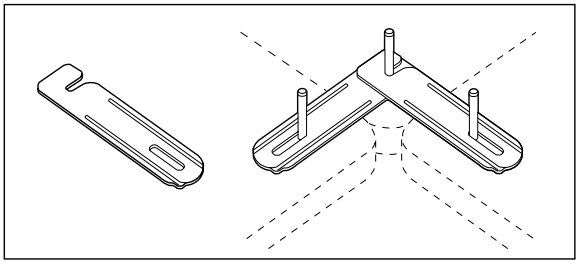

1. Turn work surface upside-down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with gliders, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.

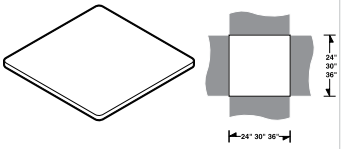

OPTIONAL GANGING HARDWARE

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn work surfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each work surface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.

Tall storage cabinet's legs provide easy access to the Cable Basket where it can easily be unclipped from spring steel brackets to rearrange cable connections. Steel wire construction, chrome finish baskets; black spring steel hanging brackets, fasteners.

Care and Cleaning

Textiles

Fabrics: To extend the life of your seating upholstered in fabric, regularly dust the chair to prevent airborne particles from penetrating the fabric surface.

For light soiling, use a damp cloth and blot the spot with very slight pressure, taking care never to soak the fabric. Dry with a clean cloth by blotting - never rub fabric. More intense stains can be treated the same way, but with a mild detergent. Always test fabric first in an unseen area before using any cleaning method.

Leather: For regular cleaning, simply use a soft damp cloth, taking care not to soak the leather. For more thorough treatment, soak a soft cloth in mild soap solution and wipe surface in a light circular motion. Repeat with clean water. Allow to dry and polish with a soft dry cloth. Do not use detergents, aerosol sprays or other polishes.

Hard Surfaces

Wood Veneer Finishes: Waxing or polishing catalyzed finishes is not recommended because this will give a greasy, cloudy or uneven appearance to the product and could void your warranty. Global's conversion varnish is best cleaned by wiping the surface with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are heavily soiled, a gentle product like "Windex" can be used, following the same instructions as above.

Laminate, painted & plated metal finishes, and solid surfaces: Wipe the surface with a clean soft damp cloth; if needed, a mild soap solution (i.e. Ivory dishwashing liquid) can be used. To prevent streaks, dry the surface with a clean, dry soft cloth moving in a circular motion.

Textiles

- **Water-Based Cleaner:** Spot clean, using the foam only from a water-based cleaning agent, such as a mild detergent or non-solvent upholstery shampoo product. Apply foam with a soft brush in a circular motion. Vacuum when dry. Pretest small area before proceeding.
- **Solvent Cleaner:** Spot clean, using a mild water-free solvent or dry cleaning product. Clean only in a well-ventilated room and avoid any product containing carbon tetrachloride or other toxic materials. Pretest a small area before proceeding.
- **Water/Solvent Cleaner:** Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room. Avoid any product that contains carbon tetrachloride or other toxic materials. With either method, pretest a small area before proceeding.
- **Vacuum Only:** Clean this fabric only by vacuuming or light brushing to prevent accumulation of dust and grime. Water-based foam cleaning agents of any kind may cause excessive shrinking, staining, or distortion of the surface pile and therefore, should not be used.
- **Crypton Cleaning:** Generally stains are removed with plain water and powdered enzyme detergent. Upholstery foam shampoo, waterbased cleaning products and germicidal detergents can be used. Be sure to remove all residue from cleaning products with clean water. Do not use solvent-based cleaners or dry cleaning products.
- These recommendations and codes were developed by fabric specialists. However, because of the various ways fabric can be stained or damaged, there is no guarantee that the results will be completely successful. Use suggested methods on your own responsibility. To help prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended. Use professional furniture cleaning services when overall soiled condition has been reached.

This illustrated price list has been designed to facilitate fast reference and easy use. Products are categorized into "seating", "desks", "files", "panels", or "tables", and are listed numerically within their categories. The line drawings match actual photographs (where possible) to aid in instant recognition of the total range within a series.

Sales of Global Furniture Group ("Global") products are made only on Global's standard Terms and Conditions of sale which are contained in this price book. These standard terms and conditions may be modified or supplemented only by a separately written document signed by Global's authorized personnel at its head office in Marlton, NJ. Any term or condition contained in any purchase order or other form used by dealer/purchaser to order goods (including standard, printed language) which is different from, in addition to, or in any way inconsistent with Global's standard terms and conditions shall be of no force or effect whatsoever.

All illustrations, specifications and prices in this list price book are based on the latest product information available at time of publication. Global reserves the right to make changes at any time and without prior notice to prices, colors, materials, specifications and models offered.

Description
Each product shown or described in this price list is standard Global product. Available options are noted at the beginning of each series. Available options may require additional delivery time and cost, and may affect the warranty given. Sizes and weights shown are approximate and are subject to slight changes from time to time.

Prices and Payment
The prices shown in this book, as well as those quoted by Global, are in United States dollars for orders shipped to destinations in the U.S. and Mexico.

If shipping date requested is more than 90 days from date of order, Global shall reserve right to use published list prices effective at the time of shipment.

Orders are invoiced at the time of shipment. Terms of payment are net 30 days from date of invoice unless otherwise stated. The customer agrees that Global shall have the right to enforce a charge amounting to 1.5% per month (18% per year) on invoices outstanding more than 30 days.

If dealer/purchaser's most recent annual net volume is less than $5,000.00, payment must be made in advance.

Any products sold by Global shall remain the personal property of Global until fully paid.

Prices are suggested list prices only and are subject to change without notice. Global will, however, attempt to keep dealer/purchasers up-to-date on all developments including price changes.

Taxes
All prices shown in this book are exclusive of sales, use, excise and other applicable taxes and are the dealer/purchaser's responsibility as per the invoice issued by Global. If dealer/purchaser claims an exemption from such taxes, it shall be the dealer/purchaser's responsibility to furnish Global with an appropriate exemption certificate at time of order.

Ordering Information
To avoid errors and/or duplication, Global requires that all orders be submitted in writing. All orders submitted to Global in writing and will be acknowledged on Global's acknowledgment forms governing the transaction. The details appearing on this acknowledgment will describe the items to be shipped and the approximate shipping date. It is the dealer/purchaser's responsibility to determine that the information in the acknowledgment is correct. In the event of an error, the dealer/purchaser must notify Global immediately by telephone followed by written confirmation. Shipping dates are assigned to orders based on the item having the longest manufacturing lead time (unless instructed to partial ship).

When ordering, please provide the following information:

1) Account number (if possible)
2) P.O. number
3) "Bill to" and "ship to" name and address
4) Complete model number
5) Description
6) Options:
   a. Upholstery fabric type and color (specify by name and number)
   b. Color of paint finish, laminate or wood (if applicable)
   c. Trim options (frame)
   d. Arms
   e. Base, Casters
   f. Mechanism
   g. Accessories

Dealer/purchaser is responsible for providing correct information when placing an order. Orders with incorrect information (finish, etc.) will be scheduled for manufacturing upon receipt of complete information.

All phone orders must be confirmed in writing by the customer within 7 days.

To prevent a delay in processing orders, please specify delivery routing.

Changes and Cancellations
After the date of Global's acknowledgment of a dealer/purchaser's order, the order may not be changed or canceled by dealer/purchaser without the written consent of Global. Special order items, C.O.M. and fabric-covered items already in production are not subject to change or cancellation under any circumstances. Textile-covered items are considered to be in production once the textile is scheduled for cutting. Other standard items already in production are subject to a minimum 35% cancellation charge.

Errors and Omissions
All quotations, acknowledgements and invoices are subject to corrections for any errors and omissions.

FINISHES
Wood Finishes
For custom stain requests, submit a special request for quotation. Non-standard wood finish orders will incur a one time charge of $250 net to dealer per matching custom wood stain. This one time fee will be valid for 5 years from the time of matching. After 5 years, a new $250 net to dealer charge will apply. All custom wood stain products will receive a 10% list per unit upcharge, included on the special quote. Requests with unit quantities of 30 or more, may be considered for reduced or eliminated upcharge. At time of order, a 3" x 3" color sample is required to be submitted with order. Extended order lead time is required for custom matching and approval process..

File Finishes
All non-standard file finishes must be approved by Global prior to acceptance of order and may be subject to an upcharge.

Laminate Tops - pricing for all non-standard finishes and sizes must be provided by Global Customer Service and may be subject to an upcharge.

Desk Finishes
Because the distinctive characteristics and the nature of wood products cause variations, exact matches are not always possible.

Global has launched a finishes program between marketing companies within the Global Group to match products as best as possible when same finishes are specified.

Customers Own Material (COM)
Use of COM must be approved by Global prior to acceptance of order. Please refer to the back of the Seating List Price Book and fill out the Authorization Request Form. Photocopy and use this form as often as necessary. The customer must provide a 12" x 12" fabric sample and advise how the fabric is to be applied. **Textile yardage requirement will be advised by the factory, and additional yardage may be required if pattern requires matching.** Yardage shown in the List Price Book does not allow for pattern repeat/matching. Send to the address provided on shipping document upon approval from Global. If C.O.M. is difficult to apply or if product shall be modified, extra charges shall be made. Global reserves the right to cancel an order at any time if C.O.M. is inadequate for any reason. Customer's Own Material must be shipped freight and duties paid to our factory. Such shipment must be fully identified with purchaser's order number, RGA # provided by Global, and the item for which material is intended. Performance of C.O.M. when applied to product is the sole responsibility of the purchaser. Global's standard product warranty shall not apply to C.O.M. Use of C.O.M. will not reduce the published list price.

The listing of prices for each model indicates the prices for higher upholstery grades. Prices are based on yardage in imperial measurements.

Any claims made against Global for apparent defects, errors or shortages must be made by the dealer/purchaser, in writing, within 15 working days after any delivery. Suspension
In the event that the dealer/purchaser defaults in the payment of any sum due to Global, or in the event the dealer/purchaser's financial condition becomes unsatisfactory to Global, Global shall have the right to defer or discontinue shipment of any goods until such time as the default is cured or the dealer/purchaser provides assurance of payment to Global.
