GROMMETS

- Grommets available in standard table top locations (left, center or right).
Order as: **AG1, AG2 or AG3. Add \$96.**
- Grommet hole dimensions are 3 1/4" wide x 1 7/8" deep.

- Actual grommet locations will vary according to base selection.

POWER BLOCK

- A Power Block (model **PMSpDM**) may be ordered on all worksurfaces.
- A Power Block is a rectangular worksurface power/data module with one electrical duplex receptacle and two data (RJ45) receptacles. 9" black cord included. Power Block dimensions are 3 1/2" deep x 6 1/2" wide x 2 3/4" high.
- Actual Power Block locations vary according to base selection. The locations will be left (AG1, E1), center (AG2, E2), and right (AG3, E3). **Example:** 8' table with drum base does not have a modesty panel, so the grommet (AG2) and power block (E2) can be perfectly centered in the table. An 8' table with a slab base has the modesty panel, so the grommet (AG2) and power block (E2) will be offset alongside the modesty panel.

B BOARDROOM TABLES

- To purchase a Power Block, you must specify both the Power Block cut-out location and the Power Block model #. Order Power Block as **PMSPDM, Add \$330**. Power Blocks are available in standard worksurface locations (left, center or right). Order as **E1, E2 or E3. Add \$96**.

Power Block **PMSPDM - Add \$330** Specify location **E1, E2 or E3 - Add \$96**

BUNGEE™ TABLES

Bungee is a series of freestanding tables and accessories designed for classrooms, training rooms, boardrooms and any other multi-functional space that may require frequent configurations. Tables are sold complete with legs and Bungee cords so they may quickly and easily be connected together without searching for tools or worrying about loose parts.

Bungee tables feature rounded corners with a unique “bubble molding” that is engineered to compress under the tension of the Bungee cords. The compressed molding creates a seal that serves to locate and align interconnected tables while also providing a soft and forgiving edge.

Choose from a variety of top shapes and laminate finishes to create your individual style. In addition, most tables offer a choice of tapered legs or spider legs in a Tungsten or Black finish with adjustable levelers or optional casters. Optional modesty panels, grommets, wire management and power blocks further enhance your workspace.

Flip-Top tables can be nested and easily stored by activating the single hand release mechanism from the left or right side.

Optional locking casters are available in Tungsten or Black (standard on Flip-Top models).

Bungee cords are utilized to quickly and easily reconfigure tables

B BUNGEE SL™ - NOTES

BUNGEE SL - a completely new product line to complement and coordinate with the Bungee Training Tables series. Bungee SL takes the popular aesthetic of the Bungee series and allows tables to be specified in shared leg and permanent applications - great for training, teaming and academic areas. Bungee SL tops and legs are sold separately, increasing the flexibility of the product in the future and allows for space saving in areas where real estate is a premium.

For greater flexibility, specify **Power and Data Management Troughs** for the BUNGEE SL table series. Add Global's proprietary 4-wire power kits and create inexpensive and versatile training, benching, academic and meeting areas. Front panels are available in Laminate or Aluminum. A center spine version allows for inexpensive double-sided applications.

Features and Benefits

- Tops are 1" thick with a choice of four edges: BB/BS - Bungee bubble edge, AB/AS - split color edge, A3 - matching edge and AR - Bicut edge.
- Legs are offered in Tapered or Spider design in a Tungsten or Black finish. Levelers are standard
- Power and data management troughs are sold separately and are meant to be used on BUNGEE SL only.

Tapered leg with levelers, offered in Tungsten or Black finish.

Optional power and data management troughs for Bungee SL. Center spine shown.

Shared leg, back-to-back tables with center spine trough.

A3 - square corner, standard edge

AR - square corner, bicut edge

Working Edge (1) - Edges designated with the letter "W" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in free-standing applications.

Connecting Edge (2) - Edges designated with the letter "C" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End Edge (3) - Edges designated with the letter "E" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90° crescent tops can be freestanding if the optional center leg is added.

FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs;

connecting tables are defined as more than one work surface supported by a single leg at each point of connection. The rule for determining the quantity of legs of an open configuration is the number of worksurfaces plus one (**See Figure 1**).

On closed configurations, the number of legs is equal to the number of worksurfaces (**See Figure 2**). There are some exceptions, such as when optional third legs are used on quarter round or 90° crescent shapes.

Figure 1. Open Configuration
Number of Surfaces = 5
Number of Legs = 6

Figure 2. Closed Configuration
Number of Surfaces = 6
Number of Legs = 6

FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables (**Figure 3**).
- When Trapezoid tops are freestanding, legs must be on the outer left and right sides (**Figure 4**).
- 90° crescent work surfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added (**Figure 5**).
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable (**Figure 6**).
- **DO NOT DRAG TABLES WHEN RE-CONFIGURING.**

Figure 3 - Freestanding Tables

Figure 4 - Trapezoid Tops

Figure 5 - Adding a Third Leg

Figure 6 - Ganging with Connected Tables

CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24"D, 30"D or 36"D) can be connected with one leg, at the connecting or end edges (**Figure 8**).
- Half round work surfaces can be used in the following ways: They must be of equal width when connected to each other (**Figure 7**) or the connecting shapes must be equal to half the width of the connecting half round (**Figure 8**).
- ConnectABLES® is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90° to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use (**Figure 9**).
- Quarter round and 90° crescent work surfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round work surfaces, it is recommended that configuration "A" be used since the outside end of the center leg in configuration "B" is almost flush with the outside edge of the worksurface. If configuration "B" is installed against a wall or where there will be no traffic flow, then configuration "B" can be used.

C CONNECTABLES® - PUTTING IT ALL TOGETHER

Legs are fastened to worksurfaces utilizing a steel-to-steel connection. Each leg comes equipped with four ¼" x 7/8" machine screws. Screws are inserted through the four oval shaped holes only. Do not use wood screws! When fastening legs to work surfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs.**

FREESTANDING TABLES

1. Turn work surface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four ¼" x 7/8" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

CONNECTING TABLES

1. Determine approximate location of desired configuration in room and turn work surfaces upside-down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first work surface. Fasten leg with two ¼" x 7/8" screws.
3. Repeat step 2 and 3 on the opposite edge of the first work surface.
4. Turn table right-side up.
5. Turn table right-side up and fasten to the previous top from the underside.
6. To add additional work surfaces repeat step 6.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.

OPTIONAL CASTERS

1. Turn work surface upside-down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with gliders, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.

**OPTIONAL GANGING HARDWARE**

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn work surfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each work surface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.

It can be easily unclipped from spring steel brackets (included) to rearrange cable connections from below worksurface. Spring steel brackets can suspend the Cable Basket below the worksurface where it keeps the cords and cables off the floor and manages them along the horizontal plane - between floor monuments and Storage Vertical Cable Manager, for example. Tall storage cabinet's legs provide easy access to the Cable Basket where it can easily be unclipped from spring steel brackets to rearrange cable connections. Steel wire construction, chrome finish baskets; black spring steel hanging brackets, fasteners.
