- The following maximums are to National Electric Code (NEC) – some local codes vary from NEC code – it is the customer's responsibility to follow all applicable local codes and guidelines.

Product	**Max units per circuit**
Villa I	8 units per circuit
Villa II	4 units per circuit
Villa USB	8 units per circuit
Oasis Mini A	3 units per circuit

- Tops are optional in high pressure laminate in 1-1/16” thick or 1.5” thick material. Products specified in high pressure laminate are finished on the underside of the surface with a kraft paper backing.
- Square, rectangular and wedge shaped tops are standard with 90˚ corner radius. Optional 2” corner radius available. Specify option (**2R**). Refer to model for upcharge.

BASES

- Drum bases are high pressure laminate over a sonotube inner wall, capped top and bottom with particle board supports. 1.5” diameter glides offer 0.5” of leveling adjustment. No additional counterweight required.
- Laminate slab bases are 1” thick thermally fused laminate, 0.75” diameter glides offer 0.5”of leveling adjustment
- Laminate arch bases for 36”D tops are 4-3/8” thick; for 48”D tops are 5” thick overall. Interior frame is covered in masonite and HPL on curved side; flat side is thermally fused laminate. 1.5” dia. glides offer 0.5” of leveling adjustment.
- Two 5.5”H support panels run between each slab or arch base component creating a concealed cavity for cable management.
- Tapered blade base (two and four feet style) consists of 2” diameter column, 16 GA with 11”x11” 12 GA mounting plate.
- Tubular base consists of 2” dia round tube, 16 GA with 11”x11” 12 GA mounting plate.

GROMMETS AND CUT-OUTS FOR POWER BLOCKS

- Power blocks can be specified separately to deliver power and data to the table surface.
- Not all cut-out/power block locations are available on all table sizes due to base positioning. Please refer to the table on the right.
- To purchase a power block, you must specify the power block cut-out location when ordering the top and order the power block separately.
- Standard cut-out options are centerline on the table horizontally; position 1 (left), position 2 (center) or position 3 (right).
  Order as **AG1**, **E1**, **M1**, **R1**, **T1**, **V1**, etc. **Add $96** for each cut-out.
- Multiple cut-outs may be ordered and multiple power blocks may be accommodated.
- Select power block option from Productivity Solutions, beginning on page page 486.
- Cut-outs may be placed in non-standard locations.
  Order as **AGS, ES, MS, RS, TS**, or **VS - Add $96**.
  A drawing must be supplied with vertical and horizontal dimensions to the center of the cut-out. Please refer to the CUSTOM GROMMET LOCATION FORM in the back reference section.

BUNGEE™ TABLES

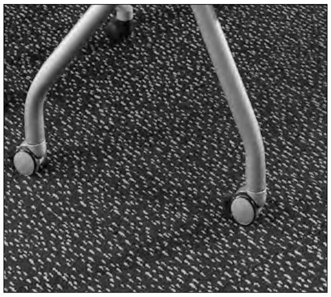
IIDEX Awards
NeoCon Canada
SILVER
AWARD 2005
ADEX
PLATINUM

Bungee is a series of freestanding tables and accessories designed for classrooms, training rooms, boardrooms and any other multi-functional space that may require frequent configurations. Tables are sold complete with legs and Bungee cords so they may quickly and easily be connected together without searching for tools or worrying about loose parts.

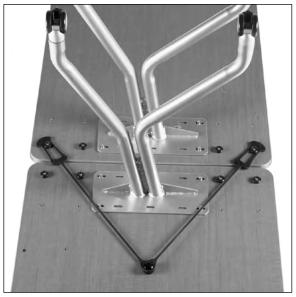
Bungee tables feature rounded corners with a unique “bubble molding” that is engineered to compress under the tension of the Bungee cords. The compressed molding creates a seal that serves to locate and align interconnected tables while also providing a soft and forgiving edge.

Choose from a variety of top shapes and laminate finishes to create your individual style. In addition, most tables offer a choice of tapered legs or spider legs in a Tungsten or Black finish with adjustable levelers or optional casters. Optional modesty panels, grommets, wire management and power blocks further enhance your workspace.

Flip-Top tables can be nested and easily stored by activating the single hand release mechanism from the left or right side.



Optional locking casters are available in Tungsten or Black (standard on Flip-Top models).



Bungee cords are utilized to quickly and easily reconfigure tables

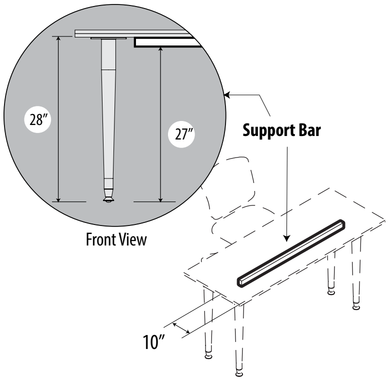
BUNGEE SL™ - NOTES

GENERAL INFORMATION

- Introducing Bungee SL - a product line to complement and coordinate with the top selling Bungee training tables series.
- Bungee SL takes the popular aesthetic of the Bungee series and allows tables to be specified in shared leg and permanent applications - great for benching, training, teaming and academic areas.
- Bungee SL tops and legs are sold separately, increasing the flexibility of the product in the future and allows for space saving in areas where real estate is a premium.
- High pressure tops are available in all Bungee SL laminates at an extended lead time - please refer to model # for pricing.
- For environmental certifications, please visit globalfurnituregroup.com

CONSTRUCTION

- Tops are 1" thick thermally fused laminate (**TFL**) or optional 1-1/16" thick high pressure laminate (**HPL**).
- All laminate components are made of 45 lb. density particle board with high performance thermally fused laminate surface or high pressure laminate surface with a kraft paper backing.
- Tops 60" and over feature a built-in support bar. The support bar is 10" from the **approach** side, and clearance to the bottom of the support bar is 27" from the floor.
- **BUNGEE CORDS ARE NOT INCLUDED AND ARE NOT COMPATIBLE WITH BUNGEE SL TOPS**



EDGE DETAIL

- Bungee SL comes with a choice of four edge styles:

A3 - square corner, standard edge

AR - square corner, bicut edge

AS - square corner, Silver

AB - square corner, Black

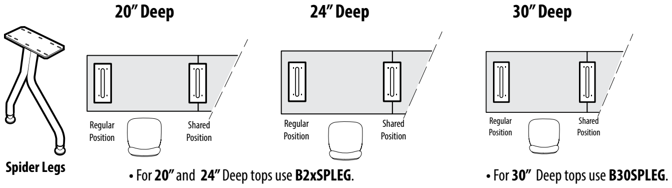
BS - rounded corner, Silver

BB - rounded corner, Black

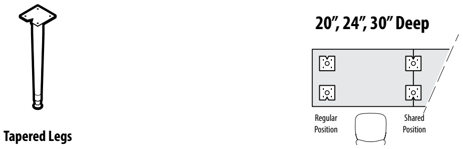
- **BB/BS** - Bungee bubble edge: unique "bubble" molding found on original Bungee
- **AB/AS** - Split color PVC edge: edge matches split color aesthetic of the bubble edge, but allows for 90 degree corners and a cleaner look.
- **A3** - 2mm preferred matching edge. Coordinates well with Adaptabilities and Zira 1" tops.
- **AR** - Bicut edge. Coordinates well with Adaptabilities and Zira 1" tops.

LEGS

- Two leg styles are available: tapered and spider leg. Available in Black (**TBL**) or Tungsten (**TTU**) finish, please specify. For added durability, paint finish is textured. Levelers are standard; casters are not available for Bungee SL legs. Levelers adjust 3mm - 10mm in height.



- For **20"** and **24"** Deep tops use **B2xSPLEG.**
- For **30"** Deep tops use **B30SPLEG.**



MODESTY PANELS

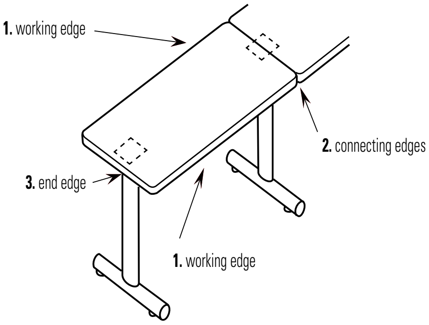
Working Edge (1) - Edges designated with the letter "**W**" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in free-standing applications.

Connecting Edge (2) - Edges designated with the letter "**C**" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End Edge (3) - Edges designated with the letter "**E**" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90˚ crescent tops can be freestanding if the optional center leg is added.



FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs; **connecting tables** are defined as more than one work surface supported by a single leg at each point of connection. The rule for determining the quantity of legs of an open configuration is the number of worksurfaces plus one **(See Figure 1)**.

On closed configurations, the number of legs is equal to the number of worksurfaces **(See Figure 2)**. There are some exceptions, such as when optional third legs are used on quarter round or 90˚ crescent shapes.

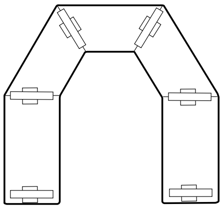


Figure 1. Open Configuration
Number of Surfaces = 5
Number of Legs = 6

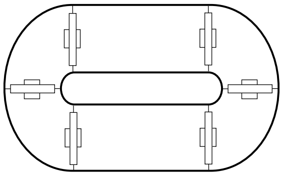

Figure 2. Closed Configuration
Number of Surfaces = 6
Number of Legs = 6

FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables **(Figure 3)**.
- When Trapezoid tops are freestanding, legs must be on the outer left and right sides **(Figure 4)**.
- 90˚ crescent work surfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added **(Figure 5)**.
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable **(Figure 6)**.
- **DO NOT DRAG TABLES WHEN RE-CONFIGURING.**

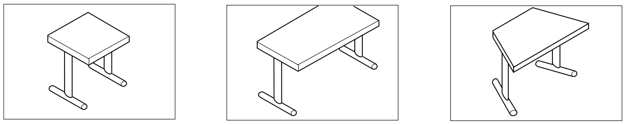

Figure 3 - Freestanding Tables

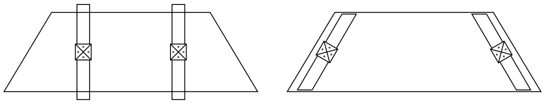

Incorrect **Correct**

Figure 4 - Trapezoid Tops

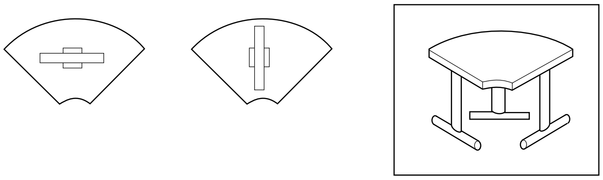

Figure 5 - Adding a Third Leg

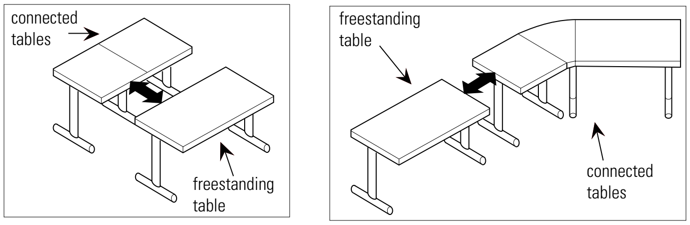

Figure 6 - Ganging with Connected Tables

CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24”D, 30”D or 36”D) can be connected with one leg, at the connecting or end edges **(Figure 8).**
- Half round work surfaces can be used in the following ways: They must be of equal width when connected to each other **(Figure 7)** or the connecting shapes must be equal to half the width of the connecting half round **(Figure 8)**.
- ConnecTABLES® is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90˚ to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use **(Figure 9)**.

- Quarter round and 90˚ crescent work surfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round work surfaces, it is recommended that configuration “A” be used since the outside end of the center leg in configuration “B” is almost flush with the outside edge of the worksurface. If configuration “B” is installed against a wall or where there will be no traffic flow, then configuration “B” can be used.

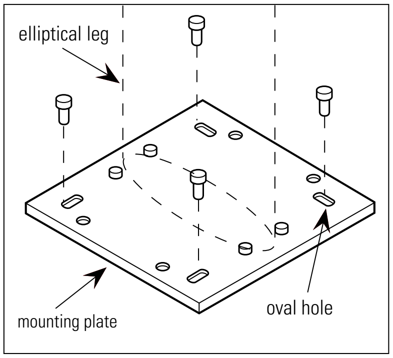
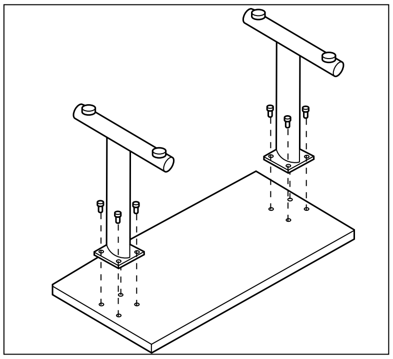
CONNECTABLES® - PUTTING IT ALL TOGETHER

Legs are fastened to worksurfaces utilizing a steel-to-steel connection. Each leg comes equipped with four ¼" x 7/8" machine screws. Screws are inserted through the four oval shaped holes only. Do not use wood screws! When fastening legs to work surfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs**.



FREESTANDING TABLES

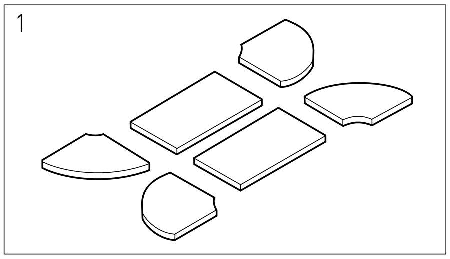
1. Turn work surface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four ¼" x 7/8" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

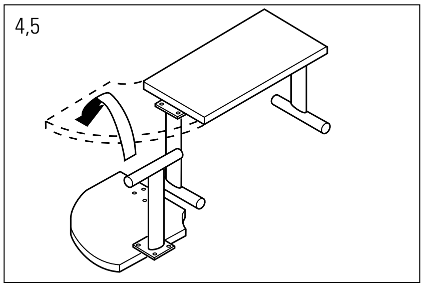


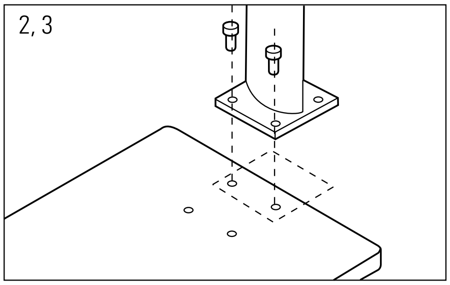
CONNECTING TABLES

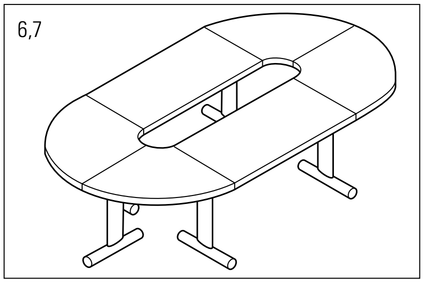
1. Determine approximate location of desired configuration in room and turn work surfaces upside-down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first work surface. Fasten leg with two ¼" x 7/8" screws.
3. Repeat step 2 and 3 on the opposite edge of the first work surface.
4. Turn table right-side up.
5. Turn table right-side up and fasten to the previous top from the underside.
6. To add additional work surfaces repeat step 6.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.





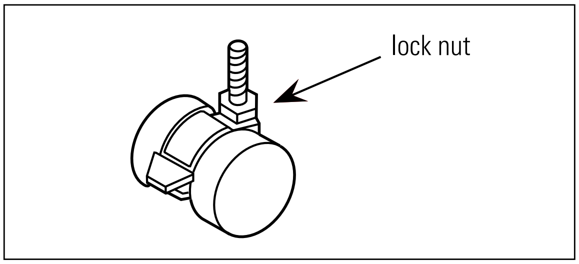




OPTIONAL CASTERS

1. Turn work surface upside-down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with gliders, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.



OPTIONAL GANGING HARDWARE

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn work surfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each work surface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.

WORKSURFACES

- **Four** material choices: high performance thermally fused laminate, high pressure laminate, veneer and solid surface.
- **Thermally fused laminate** tops are 1" thick overall, constructed of 45 lb. density particle board core; 2 mm thick flat edge band to match, contrast with, or complement the top surface or corresponding base finish.
- **High pressure laminate** tops are 1-3/16" thick overall with choice of edge detail. 2mm thick flat edge to match, contrast with or complement the top surface or corresponding base finish on a 45lbs density particle board core. Also available with knife edge detail; edge finish would match top surface; core material is MDF. Recommended for counter applications or other high use areas. Product codes with **suffix LK** indicate high pressure laminate with knife edge.

Solid surface material is 0.5" thick with built up edge profile over a particle board or plywood subtop depending on overall top size. Product codes with **suffix SF** indicate solid surface with flat edge; product codes with **suffix SK** indicate solid surface with knife edge. There is no edge finish selection on solid surface tops. For detailed material information, please reference WilsonArt's Solid Surface collection.

BASES

- **Caution**: to meet BIFMA standards for performance and stability, appropriate base size must be specified with corresponding top sizes identified. **Top plates and base plates vary by base size and will only work with table shape sizes as referenced on the following pages.**
- Bases are constructed of a round or square solid steel metal plate for counter balance, covered with a finished steel shroud, affixed with four bolts to a 3" diameter cold rolled steel tube.
- GRB14H25 attach to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GSB13H25 and GSOB13H25 attach to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GRB22H15, GRB22H21, GRB22H26, GRB22, GRB22H35, GRB22H41, GSB19H15, GSB19H21, GSB19H26,w GSB19, GSB19H35 and GSB19H41 attach to tops with a 6"x 6" steel plate, welded to a 3" diameter steel tube, bolted to a 0.5" thick solid steel counter balance.
- **Top plate and base plate of GRB22 and GSB19 models in all heights, have pass-through cut-outs to accommodate a single port simplex or dual USB module to deliver power or USB charging to the surface**. This allows the module to be mounted directly above the base and to pass the unit's cord through the base column resulting in the cord and plug head exiting from the bottom of the base for plugging into a floor or wall mount power source.
- GRB28, GRB34, GSB23 and GSB28 attach to tops with an 11" x 11" steel plate, welded to a 4" diameter steel tube, bolted to a 0.375" thick solid steel counter balance.
