

Philadelphia detailing is traditional with a 1" overhang on all edges. Solid walnut, cherry, maple, oak that bands worksurface perimeter is 1" wide by 1-3/8" thick for an overall thickness of 1-3/8". Philadelphia is a "top over pedestal" detailed series. Philadelphia is standard with a base. Floor storage unit bases (i.e. kick-plates on pedestals, lateral files, bookcases, etc.) are extended out over drawer faces and horizontally grained. Products that are normally positioned against walls, such as credenzas, have a self-edge veneered back edge detail. All primary faces have pin molding decorations.

This elegantly designed traditional furniture series employs state-of-the-art manufacturing to create traditional pieces for executive offices, conference rooms and reception areas. Philadelphia is characterized by solid-wood edge detailing with solid-wood moldings on the cases and brass hardware throughout. The finest clear hardwoods are hand-selected to ensure that the best quality and consistency is achieved. Each piece is protected with a catalyzed conversion varnish to provide one of the most durable finishes in the industry. Philadelphia makes a truly impressive statement for the discerning customer.

HARDWARE

- All necessary hardware items for attaching furniture items are included in the shipment. Actual wall attachment fasteners for wall cabinets, tackboards and visual boards are not included due to variation between site conditions.

LEVELING GLIDES

- Shipped in a plastic bag attached to the bottom of the item or inside the pedestal. It is important to install leveling glides to ensure the unit is level. Levelers have a 1" range of adjustment.

HANGING FILE RAILS

- Pre-installed on file drawer perimeters and accommodate both legal and letter size filing. Legal filing can be achieved either as side-to-side or front-to-back. Letter filing can be achieved as front-to-back filing only.

FLAT PLATES

- Flat plates are used to attach bridges and returns to desks and are shipped pre-attached to the bottom of the bridge or return.
 - Mini flat plates for securing bridge back panels to desk or credenza end panels, and quick connectors for securing modular corner units to adjacent pieces, are shipped along with screws in a plastic bag attached to the bottom of the bridge or return.
- CAUTION:** Using screws other than those supplied by Global could result in damage to finished tops.

WALL-MOUNTED CABINETS, TACKBOARDS AND VISUAL BOARDS

- Pre-attached with horizontal wall rails to the back of each unit. The wall-side components must be detached from the unit and fastened to the wall accordingly.
- Wall fasteners are not included due to the variable site conditions. Securing the wall rail to a vertical structural member is the required manner of installation. The cabinet or visual board is then lowered on to the wall rail. It is important to level the wall rail before installation.
- Wall cabinets are equipped with levelers at the bottom of the back panels for proper cabinet alignment.
- Units with doors are equipped with adjustable European door hinges to assist in door alignment. It is required to use a #8 wood screw through the back of the cabinet and the wall-mounted rail, to further secure the wall attachment.
- Tackboards have vertical grooves in the back for tasklight wiring.
- Hutches and tackboards are installed with double faced tape applied to the bottom of the end panels. The tape is shipped in a plastic bag found in the hutch. Removal of the hutch requires moderate pressure to be applied on the top of the unit towards the wall for at least a minute for the pressure sensitive tape to release. Additional support may be added by installing flat plates along the outside back of the attached units. *These flat plates are not included in the shipment.*
- Hutch tackboards are factory-installed.
- Tackboards are standard in Grade 3 panel fabrics.

MODULAR STORAGE UNITS

- Pre-drilled holes through the unfinished tops for securing to the bottom of worksurfaces
- Screws and lock keys are included in a plastic bag fastened inside the pedestal. Installer should leave a 1/8" reveal between the Modular Storage Unit and the End panel. Disassemble the Modular Unit first before relocating the entire unit to avoid damage or bodily injuries.

PEDESTAL SPACERS

- Required if pedestals are placed side by side. A 1" gap is required between the modular pedestals to allow access to vertical fingerpulls. If required, order **SP700**.

5-SIDED CORNER TABLES

- Join bridge and credenza run-offs, using the supplied quick connectors.
- Recessed end-panels in these units are pre-drilled to accept quick-connectors for easy alignment
- Accurate leveling is critical for these units to align and connect properly.
- Flat-plates are pre-attached to the worksurface to secure to the desk unit.
